1.0 EXECUTIVE SUMMARY

1.1 General Information

Project Information:

Bishop Ranch 3A
118EM01099

Consultant Information:

ATC Group Services LLC (ATC)
2400 Camino Ramon, Suite 360
San Ramon, California 94583

Telephone: (925) 460-5300

Fax: (925) 328-1090

Reconnaissance Date: January 7, 2016

Site Assessor: Ms. Audrey Lundin

Senior Reviewer: Mr. Gabe Stivala

Environmental Professionals: Ms. Audrey Lundin

Site Information:

Bishop Ranch 3A
6200 Bollinger Canyon Road
San Ramon, California 94583
Contra Costa County

Site Access Contact:

Ms. Theresa Peterson
Associate Engineer, City of San Ramon

Client Information:

Sunset Development Company
Mr. David Fields
2600 Camino Ramon, Suite 201
San Ramon, California 94583

Telephone: (925) 327-3940

Environmental Professional Statement:

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in § 312.10 part of 40 CFR 312. We have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Audrey Lundin, Due Diligence Services Manager
Environmental Professional / Site Assessor

Gabe Stivala, P.G. / Senior Geologist
Environmental Professional / Senior Reviewer

PHASE I ENVIRONMENTAL SITE ASSESSMENT
 Bishop Ranch 3A
 6200 Bollinger Canyon Road
 San Ramon, California

1.2 Findings and Conclusions Summary

ATC has performed this Phase I Environmental Site Assessment (ESA) of the property in conformance with the scope and limitations of ASTM Standard Practice E1527-13. Any exceptions to, or deletions from, this practice are described in Section 2.0 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the property. The table below provides a summary of report findings and conclusions.

| FINDINGS AND CONCLUSIONS SUMMARY | | | | | | |
|----------------------------------|---|----------------------|-----------------|----------------|--------------------------|--|
| Report Section | Further Action? | De minimis Condition | REC and/or CREC | Historical REC | ASTM Non-Scope Condition | Description |
| 4.0 | User Provided Information | No | | | | |
| 5.1.1 | Federal Database Findings | No | | | | |
| 5.1.2 | State and Tribal Database Findings | No | | | | |
| 5.1.3 | Local Environmental Record Sources | No | | | | |
| 5.3 | Historical Records Sources | Yes | X | | | 1) The property was previously utilized for agricultural purposes. |
| 6.2 | Hazardous Substance Use, Storage and Disposal | Yes | X | | | 2) Three, five-gallon uncovered buckets containing oily material were observed. Oil stains on underlying soil and distressed vegetation were observed. |
| 6.3 | Underground Storage Tanks | No | | | | |
| 6.4 | Aboveground Storage Tanks | No | | | | |
| 6.5 | Other Petroleum Products | No | | | | |
| 6.6 | Polychlorinated Biphenyls (PCBs) | No | | | | |
| 6.7 | Unidentified Substance Containers | Yes | X | | | Refer to item 2, above. |
| 6.8 | Nonhazardous Solid Waste | No | X | | | 3) Limited areas of non-hazardous trash/debris were observed onsite. |
| 6.9 | Wastewater | No | | | | |
| 6.10 | Waste Pits, Ponds and Lagoons | No | | | | |
| 6.11 | Sumps | No | | | | |
| 6.12 | Septic Systems | No | | | | |
| 6.13 | Stormwater Management System | No | | | | |
| 6.14 | Wells | No | | | | |
| 7.0 | Subsurface Vapor Migration | No | | | | |
| 8.0 | Interviews | No | | | | |
| 9.1 | Asbestos-Containing Material (ACM) | No | | | | |
| 9.2 | Radon | No | | | | |
| 9.3 | Lead in Drinking Water | No | | | | |
| 9.4 | Lead-Based Paint (LBP) | No | | | | |
| 9.5 | Mold Screening | No | | | | |
| 9.6 | Additional User Requested Services | No | | | | |

1.3 Significant Data Gap Summary

Data gaps may have been encountered during the performance of this Phase I ESA and are discussed within the section of the report where they were encountered. However, according to ASTM Standard Practice E1527-13, data gaps are only significant if "other information and/or professional experience raise reasonable concerns involving the data gap." The following is a summary of *significant data gaps* identified in this report.

PHASE I ENVIRONMENTAL SITE ASSESSMENT
Bishop Ranch 3A
6200 Bollinger Canyon Road
San Ramon, California

| SIGNIFICANT DATA GAP SUMMARY | | |
|------------------------------|---|--|
| Report Section | Description | |
| 3.5 | Current Uses of Adjoining Properties | No <i>significant data gap</i> identified. |
| 4.2 | Environmental Liens or Activity and Use Limitations (AULs) | No <i>significant data gap</i> identified. |
| 5.1 | Standard Environmental Records | No <i>significant data gap</i> identified. |
| 5.2 | Physical Setting Sources | No <i>significant data gap</i> identified. |
| 5.3 | Historical Records Sources | No <i>significant data gap</i> identified. |
| 6.1 | Methodology and Limiting Conditions | No <i>significant data gap</i> identified. |
| 8.0 | Interviews | No <i>significant data gap</i> identified. |

1.4 Recommendations

Based on information collected from the Phase I ESA, ATC offers the following recommendations:

- If future development activities include soil disturbance such as grading or excavation, soil should be characterized for hazardous substances including herbicides/pesticides and petroleum hydrocarbons to address potential impact from prior agricultural use and temporary construction staging activities (minor spills of oily material). Any identified impacted soil removed from the property should be transported and disposed in accordance with applicable regulations. The preparation of a soil management plan, prior to soil disturbance such as grading or excavation, may be warranted.
- ATC recommends that the open buckets of oily material and trash/debris observed onsite be removed from the property and disposed of in accordance with applicable regulations.

2.0 INTRODUCTION

2.1 Purpose

The purpose of this Phase I ESA was to identify recognized environmental conditions in connection with the property at the time of the site reconnaissance. The scope of work for this Phase I ESA may also include certain potential environmental conditions beyond the scope of ASTM Standard Practice E1527-13 as listed below. This report documents the findings, opinions and conclusions of the Phase I ESA.

2.2 Scope

This Phase I ESA was conducted in general accordance with the ASTM Standard Practice E1527-13, consistent with a level of care and skill ordinarily practiced by the environmental consulting profession currently providing similar services under similar circumstances. Significant additions, deletions or exceptions to ASTM Standard Practice E1527-13 are noted below or in the corresponding sections of this report. The scope of this assessment included an evaluation of the following:

- Physical setting characteristics of the property through a review of referenced sources such as topographic maps and geologic, soils and hydrologic reports.
- Usage of the property, adjoining properties and surrounding area through a review of referenced historical sources such as land title records, fire insurance maps, city directories, aerial photographs, prior reports and interviews.
- Observations and interviews regarding current property usage and conditions including: the use, treatment, storage, disposal or generation of hazardous substances, petroleum products, hazardous wastes, nonhazardous solid wastes and wastewater.
- Usage of adjoining and surrounding area properties and the likely impact of known or suspected releases of hazardous substances or petroleum products from those properties in, on or at the property.
- Information in referenced environmental agency databases and local environmental records, within the specified approximate minimum search distance from the property.
- Potential for subsurface vapor migration in, on or at the property as described in Section 7.0.

The scope of the assessment also included consideration of the following potential environmental issues or conditions that are beyond the scope of ASTM Standard Practice E1527-13:

- The scope of work for the Mold Screening was intended to be consistent with ASTM E 2418-06: Standard Guide for Readily Observable Mold and Conditions Conducive to Mold in Commercial Buildings: Baseline Survey Process. The scope of work, including potential deviations from the Standard Guide, is described as follows. The interview was limited to at least one knowledgeable person from property management or engineering staff. The document review was limited to only those relevant documents made readily available to ATC in a timely manner. The physical observations were limited to certain Heating, Ventilation and Air Conditioning (HVAC) system areas and other readily accessible building areas likely to become subject to water damage, plumbing leaks, and flooding. Unless noted otherwise herein, ATC observed the HVAC equipment room(s) and accessible mechanical rooms and, in buildings with package units in the ceiling, at least one unit per floor. Also, unless noted otherwise, ATC observed accessible areas of the basement (or lowest level), the top floor, the roof (including any penthouse areas) and at least one mid-level floor (if applicable). For multi-story buildings, the total number of floors observed (inclusive of those

already mentioned) was intended to be up to 10% of the total number of floors (if readily accessible). For hotel and multi-family buildings, ATC targeted the lowest and highest levels and roof as described above and up to 10% of units, including one per floor if readily accessible. The Mold Screening did not include destructive methods of observation. No sampling or laboratory analyses were conducted. The Mold Screening service as described herein was limited in scope and by the time and cost considerations typically associated with performing a Phase I ESA. No method can guarantee that a hazard will be discovered if evidence of the hazard is not encountered within the performance of the Mold Screening as authorized and that opinions and conclusions must, out of necessity, be extrapolated from limited information and discrete, non-continuous data points. Unidentified mold or other microbial conditions may exist on the property.

- Visual observation of suspect asbestos-containing materials (ACM), consisting of providing an opinion on the condition of suspect ACM on the property based upon visual observation during the site reconnaissance. No sampling of suspect ACM was conducted.
- Radon document review, consisting of the review of published radon data with regard to the potential for elevated levels of radon gas in the surrounding area of the property. No radon sampling was conducted.
- Lead in Drinking Water Data review, consisting of contacting the water supplier for information regarding whether or not the potable water provided to the property meets the drinking water standards for lead.
- Visual observation of Lead-based paint (LBP), consisting of providing an opinion on the potential for suspect LBP based on the construction date of buildings on the property and visual observation of the condition of suspect LBP.
- Wetlands document review, consisting of a review of a current National Wetlands Inventory map of the surrounding area to note if the property is identified as having a wetland.
- Flood plain document review, consisting of a review of a reasonably ascertainable flood plain map of the surrounding area to note if the property is identified as being located within a flood plain.
- Regulatory Agency File and Records Review, consisting of conducting a file review (i.e., via Freedom of Information Act (FOIA) request or alternative method/source) for the property and/or one adjoining property at one regulatory agency, as warranted by the findings of the ESA.

2.3 Significant Assumption

The assumptions in this report were not considered as having significant impact on the determination of *recognized environmental conditions* associated with the property.

2.4 Limitations and Exceptions

ATC has prepared this Phase I ESA report using reasonable efforts to identify *recognized environmental conditions* associated with hazardous substances or petroleum products in, on or at the property. Findings contained within this report are based on information collected from observations made on the day(s) of the site reconnaissance and from reasonably ascertainable information obtained from certain public agencies and other referenced sources.

The ASTM Standard Practice E1527-13 recognizes inherent limitations for Phase I ESAs, including, but not limited to:

PHASE I ENVIRONMENTAL SITE ASSESSMENT
Bishop Ranch 3A
6200 Bollinger Canyon Road
San Ramon, California

- *Uncertainty Not Eliminated* – A Phase I ESA cannot completely eliminate uncertainty regarding the potential for *recognized environmental conditions* in connection with any property.
- *Not Exhaustive* – A Phase I ESA is not an exhaustive investigation of the property and environmental conditions on such property.
- *Past Uses of the Property* – Phase I requirements only require review of standard historical sources at five year intervals. Therefore, past uses of property at less than five year intervals may not be discovered.

Users of this report may refer to ASTM Standard Practice E1527-13 for further information regarding these and other limitations. This report is not definitive and should not be assumed to be a complete and/or specific definition of all conditions above or below grade. Current subsurface conditions may differ from the conditions determined by surface observations, interviews and reviews of historical sources. The most reliable method of evaluating subsurface conditions is through intrusive techniques, which are beyond the scope of this report. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other property construction purposes. Any use of this report by any party, beyond the scope and intent of the original parties, shall be at the sole risk and expense of such user.

ATC makes no representation or warranty that the past or current operations at the property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes. This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated. Regardless of the findings stated in this report, ATC is not responsible for consequences or conditions arising from facts not fully disclosed to ATC during the assessment.

An independent data research company provided the government agency database referenced in this report. Information on surrounding area properties was requested for approximate minimum search distances and is assumed to be correct and complete unless obviously contradicted by ATC's observations or other credible referenced sources reviewed during the assessment. ATC shall not be liable for any such database firm's failure to make relevant files or documents properly available, to properly index files, or otherwise to fail to maintain or produce accurate or complete records.

ATC makes no warranty, guarantee or certification regarding the quality, accuracy or reliability of any prior report provided to ATC and discussed in this Phase I ESA report. ATC expressly disclaims any and all liability for any errors or omissions contained in any prior reports provided to ATC and discussed in this Phase I ESA report.

ATC used reasonable efforts to identify evidence of aboveground and underground storage tanks and ancillary equipment on the property during the assessment. "Reasonable efforts" were limited to observation of accessible areas, review of referenced public records and interviews. These reasonable efforts may not identify subsurface equipment or evidence hidden from view by things including, but not limited to, snow cover, paving, construction activities, stored materials and landscaping.

Any estimates of costs or quantities in this report are approximations for commercial real estate transaction due diligence purposes and are based on the findings, opinions and conclusions of this assessment, which are limited by the scope of the assessment, schedule demands, cost constraints, accessibility limitations and other factors associated with performing the Phase I ESA. Subsequent determinations of costs or quantities may vary from the estimates in this report. The estimated costs or quantities in this report are not intended to be used for financial disclosure related to the Financial Accounting Standards Board (FASB) Statement No. 143, FASB Interpretation No. 47, Sarbanes/Oxley Act or any United States Securities and Exchange Commission reporting obligations, and may not be used for such purposes in any form without the express written permission of ATC.

ATC is not a professional title insurance or land surveyor firm and makes no guarantee, express or implied, that any land title records acquired or reviewed in this report, or any physical descriptions or depictions of the property in this report, represent a comprehensive definition or precise delineation of property ownership or boundaries.

The Environmental Professional Statement in Section 1.1 of this report does not “certify” the findings contained in this report and is not a legal opinion of such *Environmental Professional*. The statement is intended to document ATC’s opinion that an individual meeting the qualifications of an Environmental Professional was involved in the performance of the assessment and that the activities performed by, or under the supervision of, the *Environmental Professional* were performed in conformance with the standards and practices set forth in 40 CFR Part 312 per the methodology in ASTM Standard Practice E1527-13 and the scope of work for this assessment.

Per ASTM Standard Practice E1527-13, Section 6, User Responsibilities, the User of this assessment has specific obligations for performing tasks during this assessment that will help identify the possibility of *recognized environmental conditions* in connection with the property. Failure by the User to fully comply with the requirements may impact their ability to use this report to help qualify for *Landowner Liability Protections* (LLPs) under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). ATC makes no representations or warranties regarding a User’s qualification for protection under any federal, state or local laws, rules or regulations.

In accordance with the ASTM Standard Practice E1527-13, this report is presumed to be valid for a six month period. If the report is older than six months, the following information must be updated in order for the report to be valid: (1) regulatory review, (2) site visit, (3) interviews, (4) specialized knowledge and (5) environmental liens search. Reports older than one year may not meet the ASTM Standard Practice E1527-13 and therefore, the entire report must be updated to reflect current conditions and property-specific information.

Other limitations and exceptions that are specific to the scope of this report may be found in corresponding sections.

2.5 Special Terms and Conditions (User Reliance)

This report is for the use and benefit of, and may be relied upon by, Sunset Development Company, and any of its affiliates, and third parties authorized in writing by Sunset Development Company and ATC, including the lender(s) in connection with a secured financing of the property, and their respective successors and assigns. Any third party agrees by accepting this report that any use or reliance on this report shall be limited by the exceptions and limitations in this report, and with the acknowledgment that actual site conditions may change with time, and that hidden conditions may exist at the property that were not discovered within the authorized scope of the assessment. Any use by or distribution of this report to third parties, without the express written consent of ATC, is at the sole risk and expense of such third party.

ATC makes no other representation to any third party except that it has used the degree of care and skill ordinarily exercised by environmental consultants in the preparation of the report and in the assembling of data and information related thereto. No other warranties are made to any third party, either express or implied. Unless otherwise agreed upon in writing by ATC and a third party, ATC’s liability to any third party authorized to use or rely on this report with respect to any acts or omissions shall be limited to a total maximum amount of \$100,000.

3.0 SITE DESCRIPTION

3.1 Location and Legal Description

The property address is 6200 Bollinger Canyon Road, San Ramon, Contra Costa County, California, 94583. The Site Vicinity Map is located in Appendix A. The Site Plan is located in Appendix B. Site Photographs are provided in Appendix C. According to information obtained from the Contra Costa County Assessor's Office, the property is identified as Assessor's Parcel Number (213-133-086).

3.2 Surrounding Area General Characteristics

The property is located in an area that is primarily characterized by commercial development, undeveloped land, and a community center. Specific adjacent and abutting properties are summarized in Section 3.5.

3.3 Current Use of the Property

The property consists of approximately 10.66 acres of primarily undeveloped land. A fenced contractor staging area, utilized by Granite Construction, is located on the northeastern portion of the property. A former contractor staging area, with fencing present, is located to the west of the area occupied by Granite Construction.

3.4 Description of Property Improvements

The following table provides general descriptions of the property improvements.

| PROPERTY IMPROVEMENTS | |
|---|---|
| Size of Property (approximate) | 10.66 acres |
| General Topography of Property | The topography in the property vicinity is generally flat with a slight slope towards the southeast. |
| Adjoining and/or Access/Egress Roads | The property is adjoined by Bollinger Canyon Road to the south and Camino Ramon to the west. |
| Paved or Concrete Areas (including parking) | None, with the exception of a gravel access road extending from Bollinger Canyon Road toward the occupied staging area. |
| Unimproved Areas | The property is currently unimproved. |
| Landscaped Areas | Landscaping is present along road frontages. |
| Surface Water | None |
| Potable Water Source | East Bay Municipal Utilities District (EBMUD) |
| Sanitary Sewer Utility | Central Contra Costa Sanitary District (CCCSD) |
| Storm Sewer Utility | City of San Ramon |
| Electrical Utility | Pacific Gas & Electric Company (PG&E) |
| Natural Gas Utility | PG&E |
| Current Occupancy Status | The property is currently utilized for temporary contractor staging purposes. |
| Unoccupied Buildings/Spaces/Structures | No buildings are located at the property. However, a temporary storage trailer is present within the contractor staging area. |
| Number of Occupied Buildings | None |
| Building Name or General Building Description | Not applicable (N/A) |
| Number of Floors | N/A |
| Total Square Feet of Space (approximate) | N/A |
| Construction Completion Date (year) | N/A |
| Construction Type | N/A |
| Interior Finishes Description | N/A |
| Exterior Finishes Description | N/A |
| Cooling System Type | N/A |
| Heating System Type | N/A |

PHASE I ENVIRONMENTAL SITE ASSESSMENT
 Bishop Ranch 3A
 6200 Bollinger Canyon Road
 San Ramon, California

| PROPERTY IMPROVEMENTS | |
|------------------------|--|
| Emergency Power | Portable diesel-powered generators are stored within the occupied construction staging area. |

3.5 Current Uses of Adjoining Properties

Current uses of the adjoining properties were observed to be as follows:

| Direction from Property | Address | Occupant(s) Name | Current Use | Potential Environmental Conditions |
|-------------------------------------|---|--------------------------------|---|------------------------------------|
| North | 2461 Camino Ramon | Bishop Ranch 3, parking garage | Parking garage | None |
| East, beyond Iron Horse Trail | 12501 Alcosta Boulevard | San Ramon Central Park | Community park | None |
| | 7000 Bollinger Canyon Road | San Ramon City Hill | Under construction as new city hall | None |
| South, beyond Bollinger Canyon Road | 1071 Market Place, to the southeast beyond Iron Horse Trail | Residence Inn Marriott | Extended stay hotel | None |
| | Not available | Not available | Undeveloped land, part of the San Ramon City Center Development Site | None |
| | Not available, to the southwest | Not available | Parking lot, part of the San Ramon City Center Development Site | None |
| West, beyond Camino Ramon | 2694 Camino Ramon | Not available | Commercial building, part of the San Ramon City Center Development Site | None |
| | 2600 Camino Ramon, to the northwest | Not available | Parking lot associated with a commercial building | Refer to Section 5.1.1 |

Please refer to Section 5.1.1 for discussion of regulatory database listings associated with adjoining property addresses.

4.0 USER PROVIDED INFORMATION

The following section summarizes information (if any) provided by Sunset Development Company (User) with regard to the Phase I ESA. Documentation may be found in Appendix D or where referenced in this report.

4.1 Title Records

The User provided no title records information.

4.2 Environmental Liens or Activity and Use Limitations (AULs)

The User provided no information regarding property environmental liens or activity and use limitations (AULs). ATC contracted Environmental Data Resources, Inc. (EDR) to perform an environmental lien search for the property. According to EDR, no environmental liens or AULs were identified for the property. A copy of the report is included in Appendix L.

4.3 Specialized Knowledge or Experience of the User

The User provided no specialized knowledge regarding *recognized environmental conditions* associated with the property.

4.4 Significant Valuation Reduction for Environmental Issues

The User provided no information regarding a significant valuation reduction for environmental issues associated with the property.

4.5 Owner, Property Manager and Occupant Information

The User identified the current owner as the City of San Ramon and temporary occupant as Granite Construction.

4.6 Reason for Performing Phase I ESA

According to information provided by the User, this Phase I ESA will be used in connection with a commercial real estate transaction to identify *recognized environmental conditions* associated with the property.

4.7 Other User Provided Documents

The User provided no other documents as described in the ASTM Standard Practice E1527-13.

5.0 RECORDS REVIEW

5.1 Standard Environmental Records

The regulatory agency database report discussed in this section, provided by EDR of Shelton, Connecticut, was reviewed for information regarding reported use or release of hazardous substances and petroleum products on or near the property. Unless otherwise noted, the information provided by the regulatory agency database report and other sources referenced in this report, were considered sufficient for *recognized environmental condition (REC)*, *controlled recognized environmental condition (CREC)*, *historical recognized environmental condition (HREC)* or *de minimis condition* determinations without conducting supplemental agency file reviews. ATC also reviewed the "unmappable" (also referred to as "orphan") listings within the database report, cross-referencing available address information and facility names. Unmappable sites are listings that could not be plotted with confidence, but are potentially in the general area of the property, based on the partial street address, city, or zip code. Any unmappable site that was identified by ATC as being within the approximate minimum search distance from the property, based on the site reconnaissance and/or cross-referencing to mapped listings, is included in the discussion within this section. The complete regulatory agency database report may be found in Appendix E.

The following is a summary of the findings of the database review.

| SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS | | | |
|---|---------------------------------|------------------|----------------|
| Regulatory Database | Approx. Minimum Search Distance | Property Listed? | # Sites Listed |
| Federal National Priority List (NPL) | 1 mile | No | 0 |
| Federal Delisted NPL | ½ mile | No | 0 |
| Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) list | ½ mile | No | 0 |
| Federal CERCLIS No Further Remedial Action Planned (NFRAP) | ½ mile | No | 0 |
| Federal Resource Conservation and Recovery Act (RCRA), Corrective Action facilities (CORRACTS) | 1 mile | No | 0 |

5.1.1 Federal Agency Database Findings

The property was not identified in any of the federal agency databases searched.

The following listings with a known or significant potential for release and impact on the property were identified in the federal databases searched. State database listings associated with the nearby offsite facility are discussed below, along with corresponding federal database listings.

Pacific Bell / San Ramon W1245

2600 Camino Ramon / 2600 Camino Ramon, Rooms 2E150 and 2E050

Databases: RCRA-SQG, FINDS, SWEEPS UST, UST, HIST UST, AST, CHMIRS, EMI, and CONTRA COSTA CO. SITE LIST

Approximate Distance from the Property: Adjacent to the northwest, beyond Camino Ramon

Assumed Groundwater Gradient: Upgradient

Regulatory Data Summary: The facility is classified as a small quantity generator with no violations found. The FINDS database listing, associated with other listings, indicates that the facility is tracked by the Resource Conservation and Recovery Act (RCRA) and California Hazardous Waste Tracking System - Datamart databases. The HIST UST database lists one 10,000-gallon unspecified waste underground storage tank (UST) and one 11,763-gallon unleaded gasoline UST. The AST database lists a total of 10,000 gallons of unspecified material stored in aboveground storage tank(s). The CHMIRS database reported various incidents of relatively minor spills (e.g. hydraulic oil leak near compactor unit) or odor at the facility. The releases were reportedly contained and required no further action. According to the EMI database, various emissions have been permitted between at least 2002 and 2013. According to the CONTRA COSTA CO. SITE LIST database, the facility is a UST site, has aboveground storage, is a hazardous waste generator, and has a hazardous materials business plan (HMBP) program. No notable violations or material releases were reported.

Discussion: Based on the absence of reported violations or releases, these listings are not considered to represent an environmental concern to the property.

Based on distance, topography, assumed groundwater gradient, current regulatory status, and/or the absence of reported releases, none of the other sites listed in the federal agency databases searched are considered to represent a likely past, present or material threat of release in, on, or at the property. Given

the physical setting characteristics of the property and surrounding area, supplemental agency file reviews were not warranted to verify the database report information.

5.1.2 State and Tribal Database Findings

The property was not identified in any of the state or tribal agency databases searched.

State database listings associated with a nearby offsite facility were previously discussed above in Section 5.1.1 along with corresponding federal database listings. In addition to those discussed above, the following listings with a known or significant potential for release and impact on the property were identified in the state and tribal databases searched:

Valero #7-033

1091 Market Place

Databases: LUST, HIST CORTESE, SWEEPS UST, UST, EDR Hist Auto, HAZNET, CONTRA COSTA CO. SITE LIST, and ENF

Approximate Distance from the Property: 418 feet to the east

Assumed Groundwater Gradient: Cross- to upgradient (measured)

Regulatory Data Summary: According to the LUST and HIST CORTESE databases, a gasoline release impacted other groundwater (uses other than drinking water) and regulatory case closure was granted on February 16, 2000. The SWEEPS UST database lists one 12,000-gallon regular unleaded gasoline UST, one 12,000-gallon leaded gasoline UST, and one 12,000-gallon regular unleaded gasoline UST. The facility was listed on EDR Historical Auto database, as having been occupied by Exxon (2001) and Valero (2002 through 2012). According to the HAZNET database, the facility disposed of aqueous solution with total organic residues less than 10 percent, other organic solids, and other materials via offsite disposal methods. The facility is a UST site and hazardous waste generator (less than five tons per year), and has an HMBP program, according to the CONTRA COSTA CO. SITE LIST. The ENF database identified a UST program at the Exxon facility, with historical enforcement; an enforcement letter was provided and compliance was achieved on February 16, 2000.

ATC reviewed available records maintained on the Regional Water Quality Control Board (RWQCB) GeoTracker database (<http://geotracker.waterboards.ca.gov/>). Available records confirm that a gasoline release impacted other groundwater (uses other than drinking water) and regulatory case closure was granted on February 16, 2000. The closure letter indicates that a total of four groundwater monitoring wells were installed. Groundwater was encountered at depths ranging between 6.12 and 13.91 feet below ground surface (bgs), with a flow direction towards the southwest. The release was considered a low risk groundwater case. Groundwater monitoring wells were depicted at the site, only.

Discussion: Based on the closed LUST case status and absence of documented contamination migration offsite and/or toward the property, these listings are not considered to represent an environmental concern to the property.

Based on distance, topography, assumed groundwater gradient, current regulatory status, and/or the absence of reported releases, none of the other sites listed in the state and tribal agency databases searched are considered to represent a likely past, present or material threat of release in, on, or at the property. Given the physical setting characteristics of the property and surrounding area, supplemental agency file reviews were not warranted to verify the database report information.

5.1.3 Local Environmental Records Sources

Department of Toxic Substances Control

ATC requested files pertaining to the property from the Department of Toxic Substances Control (DTSC). According to Ms. Liang Yu Ma from the DTSC (December 31, 2015, written correspondence) no records were available for the property.

Furthermore, according to the DTSC EnviroStor database (<http://www.envirostor.dtsc.ca.gov/public>), the DTSC has no records pertaining to the property.

Regional Water Quality Control Board

ATC requested files pertaining to the property from the RWQCB. According to Ms. Melinda Wong from the RWQCB (January 8, 2016, telephone conversation), no files are available for the property.

Furthermore, according to the RWQCB GeoTracker database (<http://geotracker.waterboards.ca.gov/>), the RWQCB has no records pertaining to the property.

Bay Area Air Quality Management District

ATC contacted the Bay Area Air Quality Management District (BAAQMD) to review available information regarding the property. According to Ms. Rochelle Reed from the BAAQMD (December 28, 2015, written correspondence), no files are available for the property.

Local Health Department

ATC contacted the Contra Costa County Environmental Health Department (CCCEHD) to review available information regarding the property. According to Ms. Alex McMullen from the CCCEHD (December 28, 2015, written correspondence), no files are available for the property.

Fire Department

ATC contacted the San Ramon Valley Fire Protection District (SRVFPD) to review available information regarding the property. Available records included plan review and inspection records for a Hop Festival event held at the property in 2013. No violations or releases were reported and ATC's review of SRVFPD records identified no environmental concerns.

Department of Planning and Zoning

According to the City of San Ramon Planning Department (SRPD), the property is currently zoned as CCMU (City Center Mixed Use).

Building Department

ATC reviewed available building department records maintained at the City of San Ramon Building Department (SRBD). Available records are discussed in Section 5.3.7.

Electrical Utility Company

According to the SRPD, PG&E provides electric utilities to the property. Please refer to Section 6.6 for further information on the potential presence of PCB-containing electrical equipment on the property.

Water Utility

Potable water in the property vicinity is provided by EBMUD. ATC reviewed the 2014 Water Quality Report produced by EBMUD. Most of the year, the drinking water comes from Pardee Reservoir in the Sierra Nevada mountains. Some parts of EBMUD's service area draw water year-round from EBMUD's Sierra Nevada supply. During times of high water demand, system maintenance or for operational needs, drinking water may come from local watersheds and may be treated at a different facility. The property vicinity appears to be located in an area served by water sourced from the Pardee Reservoir and treated at the Walnut Creek water treatment plant. No concerns were noted during the review of EBMUD data. EBMUD water meets or exceeds all federal and state water quality regulations, including those for lead. A copy of EBMUD's 2014 Annual Water Quality Report is included in Appendix L.

Sewer Utility

ATC confirmed that the City of San Ramon provides municipal storm sewer utilities and the CCCSD provides sanitary sewer utilities to the property vicinity.

Other Local Environmental Records Sources

No additional local environmental records sources were reviewed.

5.2 Physical Setting Sources

5.2.1 Topography

Based on the United States Geological Survey (USGS) 7.5-Minute Topographic Map Series, *Diablo, California, Quadrangle* Topographic Map, 2012, the property is located approximately 443 feet above mean sea level (MSL) and has a sloping topography towards the southeast.

A copy of the topographic map is included in Appendix A.

5.2.2 Geology

Based on the California Department of Conservation, *California Geological Survey, Generalized Geologic Map of California Note 17*, dated April 2002, the property is primarily underlain by Tertiary sedimentary rocks. Sedimentary rocks form as accumulations of mineral material in oceans (marine) or on continents (continental). Tertiary sedimentary rocks include sandstone, shale, and conglomerate usually deposited in relatively shallow marine water near the continental margin.

5.2.3 Soils

According to ATC's review of the United States Department of Agriculture Soil Conservation Service *Web-Based Soil Survey*, the western portion of the property is underlain by Clear Lake clay, the eastern portion is underlain by Pescadero clay loam, and the southern portion is underlain by Conejo clay loam. The Clear Lake clay series consists of poorly drained soils formed from clayey alluvium derived from metamorphic and sedimentary rock. Slopes range from 0 to 15 percent. The Pescadero clay loam series consists of poorly drains soils formed from alluvium derived from sedimentary rock. Slopes range from 0 to 2 percent. The Conejo clay loam series consists of well drained soils formed from alluvium derived from sedimentary rock. Slopes range from 0 to 2 percent. A copy of the soil map is included in Appendix L.

5.2.4 Hydrology

Considering the surface topography for the property area, as interpreted from the *Diablo, California Quadrangle* map, local groundwater would be expected to flow toward the southeast. Therefore, in

assessing potential off-site environmental impacts, facilities located directly northwest of the property are of primary concern. However, actual groundwater flow direction is often locally influenced by factors such as underground structures, seasonal fluctuations, soil and bedrock geology, production wells, and other factors beyond the scope of this study. The actual groundwater flow direction under the property can be accurately determined only by installing groundwater monitoring wells, which was beyond the scope of this project.

Information obtained from the Federal USGS (FED USGS) Well Information database included in the EDR database report, indicated that five wells are located within approximately one mile of the property. Groundwater in these wells, was measured at depths ranging between 13.0 and 115.0 feet bgs. ATC also reviewed well information on the Gregg Drilling website (<http://www.greggdrilling.com>) which indicated that the depth to groundwater in San Ramon ranges between 9.0 and 22.0 feet bgs.

5.2.5 Other Physical Setting Sources

Flood Plain Map

According to the Federal Emergency Management Agency (FEMA), the property is located in Flood Zone X, identified by FEMA as “areas determined to be outside [of] the 0.2% annual chance floodplain,” (Flood Insurance Rate Map [FIRM] Map Number 06013C0464F, dated June 16, 2009). A copy of the FIRM is included in Appendix L.

Wetlands Map

Based on a review of the United States Department of the Interior, National Wetlands Inventory (NWI) Map (online Wetlands Mapper), there are no jurisdictional wetlands on the property. Furthermore, ATC did not observe any areas suggestive of wetlands at the property. A copy of the National Wetlands Inventory map is included in Appendix L.

5.3 Historical Records Sources

The following table summarizes the findings of the research presented below pertaining to historical property and surrounding area uses.

| HISTORICAL USE SUMMARY | | | | |
|------------------------|-----------------------------|---|--|---|
| Period | Identified Historical Uses | | Source(s) | Intervals/Comments |
| | Property | Surrounding Area | | |
| Prior to 1940 | Undeveloped Agricultural | Undeveloped Agricultural Residential Commercial Railroad Tracks | Aerial Photograph Topographic Maps | The earliest record available was a topographic map dated 1896. No <i>significant data gaps</i> identified. |
| 1940 - 1960 | Undeveloped Agricultural | Undeveloped Agricultural Residential Commercial Railroad Tracks | Aerial Photographs Topographic Maps | No <i>significant data gaps</i> identified. |
| 1961 - 1980 | Undeveloped Agricultural | Undeveloped Agricultural Residential Commercial Railroad Tracks | Aerial Photographs Topographic Maps | No <i>significant data gaps</i> identified. |

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Bishop Ranch 3A
6200 Bollinger Canyon Road
San Ramon, California

| HISTORICAL USE SUMMARY | | | | |
|------------------------|-------------------------------------|--|--|---|
| Period | Identified Historical Uses | | Source(s) | Intervals/Comments |
| | Property | Surrounding Area | | |
| 1981 - 2000 | Undeveloped Agricultural | Undeveloped Agricultural Residential Commercial Park | Aerial Photographs City Directories | No <i>significant data gaps</i> identified. |
| 2001 - present | Undeveloped Construction Staging | Undeveloped Commercial Park | Aerial Photographs Tax Files Topographic Map City Directories Building Department Zoning Department | No <i>significant data gaps</i> identified. |

The property was historically utilized for agricultural purposes. Based on the historical agricultural usage of the property, pesticides and/or herbicides may have been utilized on the property and near-surface soils may have at one time contained these compounds; however, evidence of large scale pesticides and/or herbicides use, storage or mixing was not observed during review of historical sources.

5.3.1 Aerial Photographs

ATC obtained available aerial photographs of the property and surrounding areas from EDR. Available aerial photographs ranged from 1939 to 2012. The following are descriptions and interpretations from the aerial photograph review. Copies of reproducible aerial photographs are included in Appendix F.

| AERIAL PHOTOGRAPH SUMMARY | | |
|--|-------------------|--|
| Year | Scale | Comments |
| 1939, 1946, 1949, 1950, 1959, 1966, and 1968 | 1 inch = 500 feet | Property: Undeveloped and/or agricultural land. Surrounding Area: Undeveloped and/or agricultural land with what appear to be residential or commercial structures located further to the north. |
| 1979 | 1 inch = 500 feet | Property: Generally the same as the previous aerial photograph. Surrounding Area: Generally the same as the previous aerial photograph, with the exception of Bollinger Canyon Road depicted to the south. |
| 1982 | 1 inch = 500 feet | Property: Generally the same as the previous aerial photograph. Surrounding Area: Generally the same as the previous aerial photograph, with the exception of the construction of commercial development to the west (and further to the southwest) and residential development further to the northeast. |
| 1993 and 1998 | 1 inch = 500 feet | Property: Undeveloped land. Surrounding Area: Undeveloped land to the north and south. Areas to the east and west appear to be developed in its current configuration. The existing road configuration is present. |
| 2005, 2006, 2009, 2010, and 2012 | 1 inch = 500 feet | Property: Generally depicted in its current configuration. Surrounding Area: Generally depicted in its current configuration. |

The review of aerial photographs did not identify past uses indicating *recognized environmental conditions* in, on, or at the property or surrounding area.

5.3.2 Fire Insurance Maps

ATC requested copies of historical Sanborn Fire Insurance Maps (Sanborn Maps) depicting the property and surrounding area from EDR. According to EDR, Sanborn Map coverage of the property is not available. A copy of EDR's "unmapped property" letter is included in Appendix G.

PHASE I ENVIRONMENTAL SITE ASSESSMENT
 Bishop Ranch 3A
 6200 Bollinger Canyon Road
 San Ramon, California

5.3.3 Property Tax Files

ATC reviewed available tax files maintained at the Contra Costa County Assessor's Office for historical ownership information of the property. Documentation is included in Appendix G.

| TAX RECORDS OWNERSHIP SUMMARY | |
|--|---------------------------|
| Owner | Date |
| City of San Ramon, a municipal corporation | June 2001 to present |
| Sunset Land Company, LLC, a California limited liability company | Unknown date to June 2001 |

The review of tax files did not identify past uses indicating *recognized environmental conditions* at the property.

5.3.4 Recorded Land Title Records

The acquisition of recorded land title records was not required by the scope of work for the Phase I ESA.

5.3.5 Historical USGS Topographic Maps

ATC reviewed historical topographic maps obtained from EDR dated 1896, 1898, 1943, 1953, 1968, 1973, 1980, and 2012. The historical topographic maps were reviewed with the intent to evaluate changes in land use and areas of potential environmental concern visible at the property.

Between 1896 and 1898, the property vicinity was generally depicted as undeveloped land. By 1943, agricultural land was depicted to the west, railroad tracks (San Ramon Branch) were located to the east, and small unspecified structures were depicted further to the north. By 1953, the property and surrounding areas to the north, south, and west were depicted as agricultural land. Railroad tracks (Southern Pacific) were depicted to the east. By 1973, agricultural land was no longer depicted at the property. In 1980, the property vicinity was generally depicted as undeveloped land. Bollinger Canyon Road was depicted to the south, a railroad grade area was located to the east, and small unspecified structures were depicted further to the north. In 2012, the property vicinity was depicted as generally undeveloped land. The existing road configuration was present.

Documentation is included in Appendix G. The review of historical USGS Topographic Maps did not identify past uses indicating *recognized environmental conditions* in, on, or at the property or surrounding area.

5.3.6 City Directories

Research regarding the availability of historical city directories was conducted by EDR. The following are descriptions and interpretations from the historical city directory review. Documentation is included in Appendix G.

| CITY DIRECTORY SUMMARY | |
|------------------------|---|
| Year | Comments |
| 1975 – 1980 | Property: No listings Surrounding Area: No listings |
| 1985 – 1992 | Property: No listings Surrounding Area: 6001 Bollinger Canyon Road: Chevron Corp. Office Park |
| 1995 | Property: No listings Surrounding Area: No listings |

PHASE I ENVIRONMENTAL SITE ASSESSMENT
 Bishop Ranch 3A
 6200 Bollinger Canyon Road
 San Ramon, California

| CITY DIRECTORY SUMMARY | |
|------------------------|---|
| Year | Comments |
| 1999 | Property: No listings Surrounding Area: 6001 Bollinger Canyon Road: Chevron Corp. Office Park 6101 Bollinger Canyon Road: Office building 6111 Bollinger Canyon Road: Office building |
| 2003 | Property: No listings Surrounding Area: 6001 Bollinger Canyon Road: Chevron Corp. Office Park |
| 2008 | Property: No listings Surrounding Area: 6001 Bollinger Canyon Road: Chevron Corp. Office Park 6101 Bollinger Canyon Road: Chevron office building 6111 Bollinger Canyon Road: Multi-tenant office building 6121 Bollinger Canyon Road: Multi-tenant office building |
| 2013 | Property: No listings Surrounding Area: 6001 Bollinger Canyon Road: Chevron Corp. Office Park 6101 Bollinger Canyon Road: Multi-tenant office building 6111 Bollinger Canyon Road: Multi-tenant office building 6121 Bollinger Canyon Road: Pacific Gas & Electric Company |

The review of city directories did not identify past uses indicating *recognized environmental conditions* in, on, or at the property or surrounding areas.

5.3.7 Building Department Records

ATC reviewed available historical building department records maintained at the SRBD for information regarding past uses of the property and surrounding area. Minimal available permits pertain to electrical permitting (2009), signage (2002), and planning review (2002). No records were available for prior onsite structures.

The review of building department records did not identify past uses indicating *recognized environmental conditions* in, on, or at the property or surrounding area. Documentation is included in Appendix G.

5.3.8 Zoning/Land Use Records

According to the SRPD, the property is currently zoned as CCMU, defined as City Center Mixed Use, which appears to be appropriate for the current use. No historical zoning information was available for the property. However, Cardno ATC's research indicates that the property was historically utilized for agricultural purposes.

5.3.9 Prior Reports

No prior reports were made available for review.

5.3.10 Other Historical Sources

No other historical sources were reviewed.

6.0 SITE RECONNAISSANCE

The following is a summary of visual and/or physical observations of the property on the day of the site visit. Photographs can be found in Appendix C.

6.1 Methodology and Limiting Conditions

Ms. Audrey Lundin, ATC Due Diligence Services Manager, conducted the site reconnaissance on January 7, 2016 and was unescorted during the site reconnaissance. The site reconnaissance consisted of visual and/or physical observations of: the property and improvements; adjoining sites as viewed from the property; and, the surrounding area based on visual observations made during the trip to and from the property. Unimproved portions of the property were observed along the perimeter and in a general grid pattern in safely accessible areas, if accessible and possible. Weather conditions at the time of the site reconnaissance were cool and cloudy with no visibility limitations.

6.2 Hazardous Substance Use, Storage, and Disposal

ATC observed the storage of hazardous substances on the property, within the construction staging area occupied by Granite Construction. In general, retail packages of maintenance products were observed to be stored within a temporary trailer, within flammable cabinets, and on trucks/vehicles within the staging area.

A storage container for a radioactive equipment item was observed within the trailer.

Piles of asphalt, gravel, sand, and dirt were observed within the staging area.

One five-gallon bucket of oily material was observed along the southeastern portion of the staging area. The uncovered bucket appeared to have overflowed during recent rains, resulting in oil stains on soil and distressed vegetation. The area of soil/vegetation impact appeared to be approximately 10 square feet or greater in size.

One five-gallon bucket of oily sludge material was observed along the northern side of the storage trailer. The uncovered bucket appeared to have overflowed during recent rains. Minor oil staining was observed on items stored in the vicinity, as well as underlying soil.

An additional uncovered five-gallon bucket of oily material was observed near the northeastern cover of the trailer. Although it likely overflowed, no notable stains were readily observed on the underlying soil.

A light oil sheen was observed on rainwater puddles within the construction staging area.

Limited areas of oil staining within the vicinity of the currently occupied construction staging area are considered to represent a *de minimis* condition to the property.

6.3 Underground Storage Tanks (USTs)

ATC did not observe evidence of USTs on the property.

6.4 Aboveground Storage Tanks (ASTs)

ATC did not observe evidence of ASTs on the property.

6.5 Other Petroleum Products

ATC observed evidence of the use, storage or disposal of other petroleum products in, on or at the property

as summarized below. Small internal diesel tanks are likely present within portable emergency generators. Equipment stored in the construction staging area may contain hydraulic fluid and gasoline/diesel fuel. Equipment appeared to be newer in age and no notable spills were observed.

The temporary presence of the listed petroleum containing equipment is not considered to represent a *recognized environmental condition* to the property, based on the absence of notable spills or releases within the equipment vicinity.

6.6 Polychlorinated Biphenyls (PCBs)

ATC observed underground transformer vaults/electrical features located along the landscaped portions of the property. The transformer units/features are owned and operated by PG&E, which is responsible for the maintenance of the transformer units. Given the utility ownership and observed conditions, the electrical transformers are not considered to represent an environmental concern to the property at this time. Furthermore, given the age of the property improvements, it is not considered likely that the transformer fluid contains PCBs.

No other suspect PCB-containing equipment was observed at the property at the time of the site reconnaissance.

6.7 Unidentified Substance Containers

As discussed in Section 6.2, ATC observed evidence of three uncovered five-gallon buckets containing oily materials. Oil stains were generally observed on underlying soil. Limited areas of oil staining within the vicinity of the currently occupied construction staging area are considered to represent a *de minimis* condition to the property.

6.8 Nonhazardous Solid Waste

ATC observed evidence of the generation, storage or disposal of nonhazardous solid waste in, on or at the property as summarized below. One 40-yard dumpster is located within Granite Construction's staging area. Labels indicate that Ferma Corporation provides "Green Box Service" of the dumpster.

Limited areas of non-hazardous trash/debris (plastic wrappers) were observed at the property. The observed trash/debris dumped on the property is considered to represent a *de minimis* condition to the property.

6.9 Wastewater

ATC observed evidence of wastewater generated, treated or discharged (including sanitary sewage and stormwater) in, on or at the property or to adjoining properties as summarized below.

| WASTEWATER SUMMARY TABLE | | | |
|--------------------------|--------------------|-------------------|----------------|
| Type of Wastewater | Generation Process | Treatment System? | Discharged To? |
| Stormwater | Stormwater runoff | No | Storm sewer |

The generation and discharge of wastewater at the property is not considered to represent an environmental condition.

6.10 Waste Pits, Ponds and Lagoons

ATC did not observe evidence of waste pits, ponds or lagoons in, on or at the property.

6.11 Drains and Sumps

ATC did not observe evidence of drains or sumps in, on or at the property, with the exception of storm drains.

6.12 Septic Systems

ATC did not observe evidence of a septic system in, on or at the property.

6.13 Stormwater Management System

Stormwater with gathers on the property infiltrates the ground or flows toward catch basins.

6.14 Wells

ATC did not observe evidence of wells in, on or at the property.

7.0 SUBSURFACE VAPOR MIGRATION

ATC conducted a limited screening for potential vapor encroachment conditions (VECs) that may affect the property. The VEC screening focused on the current and historical usage of the property and also utilized the aforementioned regulatory agency database report provided by EDR and an EDR Vapor Encroachment Screen (VES) Report to evaluate identified Chemicals of Concern (COCs), including petroleum hydrocarbons. To identify the area of concern (AOC) for contaminated sites with non-petroleum hydrocarbon COCs, ATC utilized the approximate minimum search distance defined by ASTM E 2600-10 of 1,760 feet (1/3 mile) from the property boundary for COC-contaminated sites. For sites contaminated with petroleum hydrocarbon COCs, ATC utilized the AOC approximate minimum search distance of 528 feet (1/10 mile). The AOC was adjusted accordingly based on review of physical setting characteristics, known release information, property and land features, groundwater flow direction, and soil type, et al.

ASTM's Vapor Encroachment guidance indicates that when groundwater flow direction can be estimated or determined, the cross-gradient or downgradient radius distances can be significantly reduced. The EDR VES report calculates the reduced AOC distances when considering groundwater flow direction by utilizing the following default distances, which were determined using the Buonicore Methodology: (non-petroleum hydrocarbon COCs) 1,760 feet in the upgradient direction; 365 feet in the cross-gradient direction; and 100 feet in the downgradient direction and (petroleum hydrocarbon COCs) 528 feet in the upgradient direction; 165 feet in the cross-gradient direction if Light, Non-Aqueous Phase Liquid, (LNAPL i.e. floating product) is suspected; 95 feet in the cross-gradient direction if no LNAPL is suspected; 100 feet in the downgradient direction (LNAPL suspected); and 30 feet in the downgradient position (LNAPL not suspected).

ATC reviewed potential sources of COCs from the facilities reported on the EDR database report and VES report.

No VECs were identified in relation to the property.

8.0 INTERVIEWS

The following persons were interviewed to obtain information regarding *recognized environmental conditions* in connection with the property:

| INTERVIEW SUMMARY | | | | |
|----------------------|------------------|--|----------------------------|-----------------------------------|
| Role | Name | Title/Company | Years Assoc. With Property | Interview Type |
| Owner / Site Contact | Theresa Peterson | Associate Engineer / City of San Ramon | Unknown | In person Telephone Written |

Not included in this listing are those governmental employees that were contacted solely for the purpose of retrieving public information pertaining to the property and who would not be expected to have first-hand knowledge of *recognized environmental conditions* at the property.

Pertinent information from the interviews is discussed in applicable sections of this report with details (including failed attempts to interview) documented on Record of Communication forms in Appendix J.

9.0 OTHER ENVIRONMENTAL CONDITIONS

9.1 Asbestos-Containing Materials (ACM)

No buildings are present at the property. Therefore, consideration of ACM was not included in the scope of work for this ESA.

9.2 Radon

Radon is a naturally-occurring colorless, odorless gas that is a by-product of the decay of radioactive materials potentially present in bedrock and soil. The EPA guidance action level for annual residential exposure to radon is 4.0 picoCuries per liter of air (pCi/L). The guidance action level is not a regulatory requirement for private owners of commercial real estate, but is commonly used for comparison purposes to suggest whether further action at a building may be prudent.

Cardno ATC's review of published radon data indicates that the property is located in U.S. EPA Radon Zone 2, an area of moderate propensity with regard to the potential for elevated levels of radon gas. Zone 2 areas have predicted radon concentrations between 2 and 4 pCi/L. Out of 41 sites in the property vicinity (zip code 94583) tested for radon, three of the results were above 4.0 pCi/L. Given the available statistics and the undeveloped/staging area usage of the property improvements, radon is not considered to represent a concern, and no additional action or investigations are recommended.

9.3 Lead in Drinking Water

ATC confirmed with the EBMUD that the municipally-supplied water meets all drinking water standards, including those for lead. Lead in drinking water testing was not conducted for this Phase I ESA. No buildings are present at the property.

9.4 Lead-Based Paint (LBP)

No buildings are present at the property. Therefore, consideration of LBP on painted surfaces was not included in the scope of work for this ESA.

9.5 Mold Screening

No buildings are present at the property. Therefore, consideration of mold was not included in the scope of work for this ESA.

9.6 Additional User Requested Conditions

No additional User requested services were included in the scope of work for this ESA.

11.0 TERMINOLOGY

The following provides definitions and descriptions of certain terms that may be used in this report. Italics indicate terms that are defined by ASTM Standard Practice E1527-13. The Standard Practice should be referenced for further detail (such as the precise wording), related definitions or additional explanation regarding the meaning of terms.

recognized environmental condition(s) (REC) - the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

material threat - a physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the environmental professional (EP), is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank system that contains a hazardous substance and which shows evidence of damage such that it may cause or contribute to tank integrity failure with a release of contents to the environment.

de minimis condition – is a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of the appropriate governmental agencies. An example might include a release of *hazardous substances* or *petroleum products* that could reasonably and foreseeably result in a concentration exceeding the applicable regulatory agency risk-based residential standards or substantial damage to natural resources. The risk of that exposure or damage would represent a threat to human health or the environment. If an enforcement action would be less likely than not, then the condition is considered to be generally not likely the subject of an enforcement action. A condition determined to be *de minimis* is not a *REC* or *controlled recognized environmental condition (CREC)*.

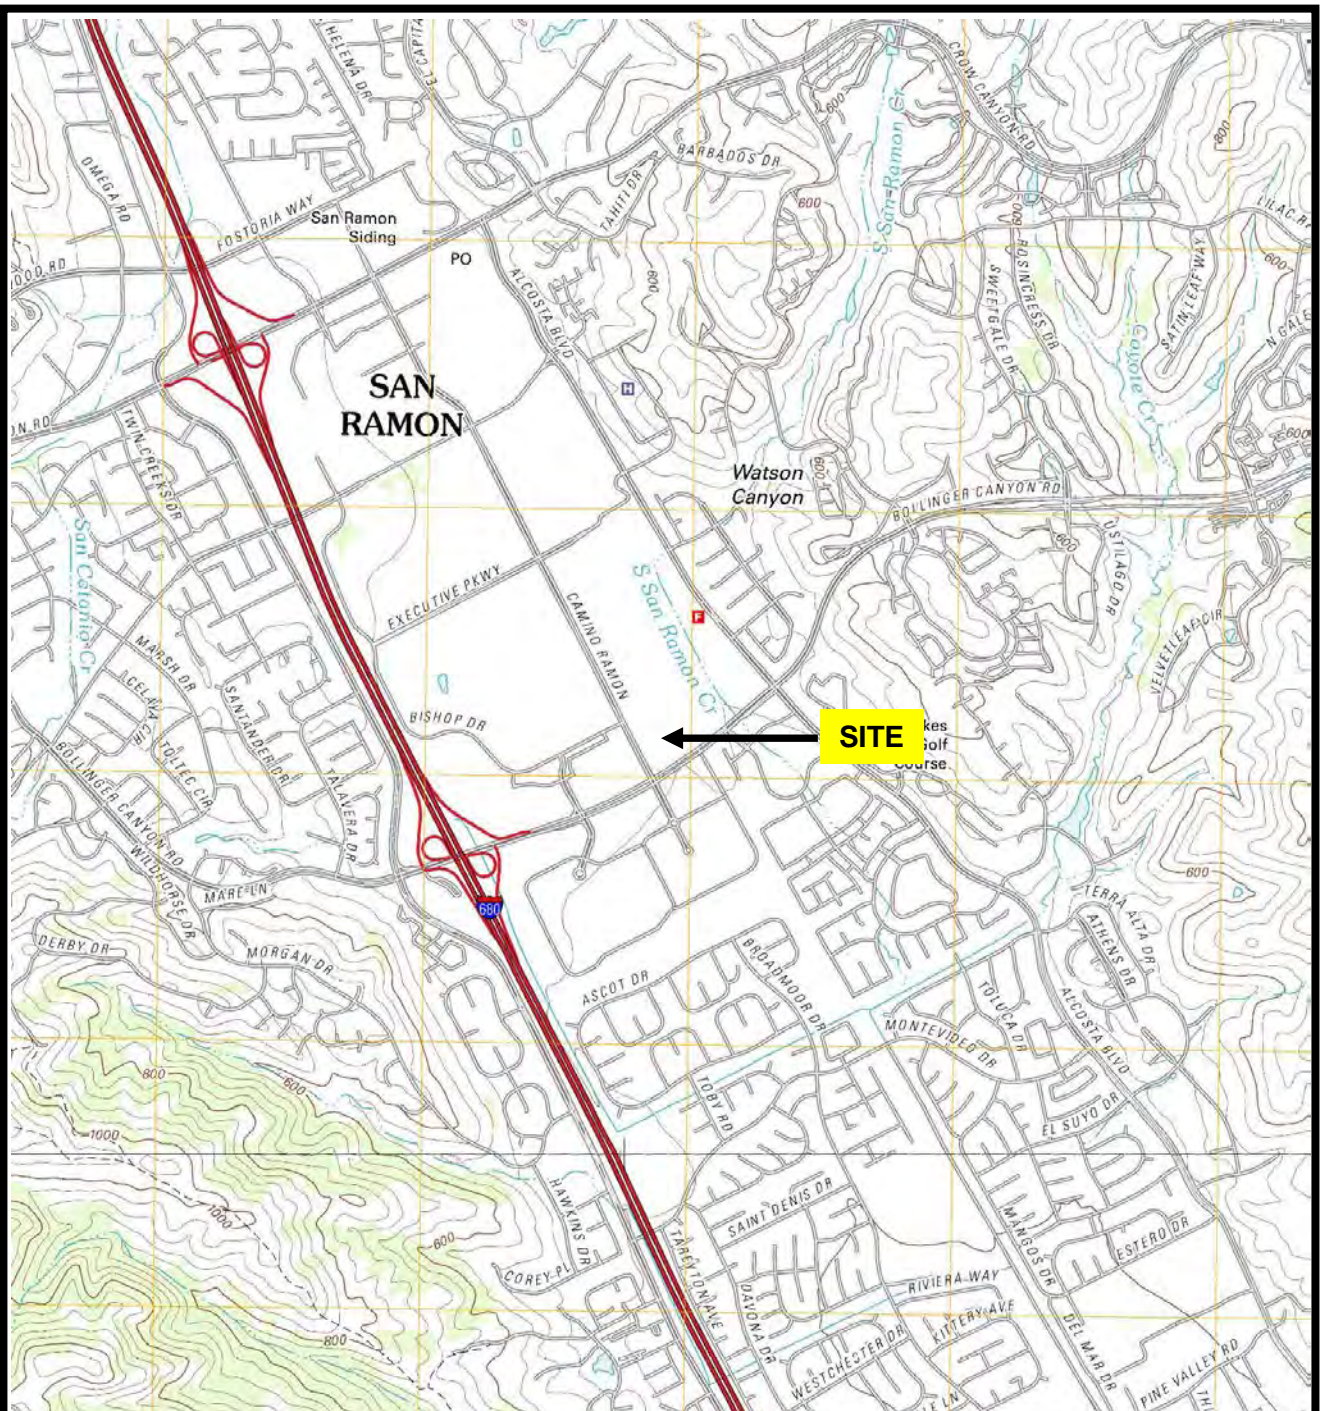

historical recognized environmental condition(s) (HREC) - a past release of any *hazardous substances* or *petroleum products* that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a *HREC*, the EP must determine whether the past release is a *REC* at the time the assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a *REC* at the time the Phase I ESA is conducted, the condition will be reported in Section 1.2 the Findings and Conclusions Summary table as a *REC*.

controlled recognized environmental condition (CREC) - a *recognized environmental condition* resulting from a past release of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitation, institutional controls, or engineering controls). Per E1527-13, a *CREC* will be reported in the Section 1.2 Findings and Conclusions Summary table as a *CREC* and a *REC*.

migrate/migration - refers to the movement of *hazardous substances* or *petroleum products* in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/09/2015 has revealed that there is 1

EXECUTIVE SUMMARY

RCRA-LQG site within approximately 0.25 miles of the target property.

| <u>Equal/Higher Elevation</u> | <u>Address</u> | <u>Direction / Distance</u> | <u>Map ID</u> | <u>Page</u> |

| AT&T MOBILITY/CHEVRO | 6001 BOLLINGER CANYO | SW 1/8 - 1/4 (0.187 mi.) | E16 | 38 |

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/09/2015 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

| PACIFIC BELL | 2600 CAMINO RAMON RM | NW 1/8 - 1/4 (0.139 mi.) | C10 | 17 |

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 11/07/2015 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 10/21/2015 has revealed that there are 3 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 10/21/2015 has revealed that there are 4 UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 3 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/09/2015 has revealed that

EXECUTIVE SUMMARY

there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

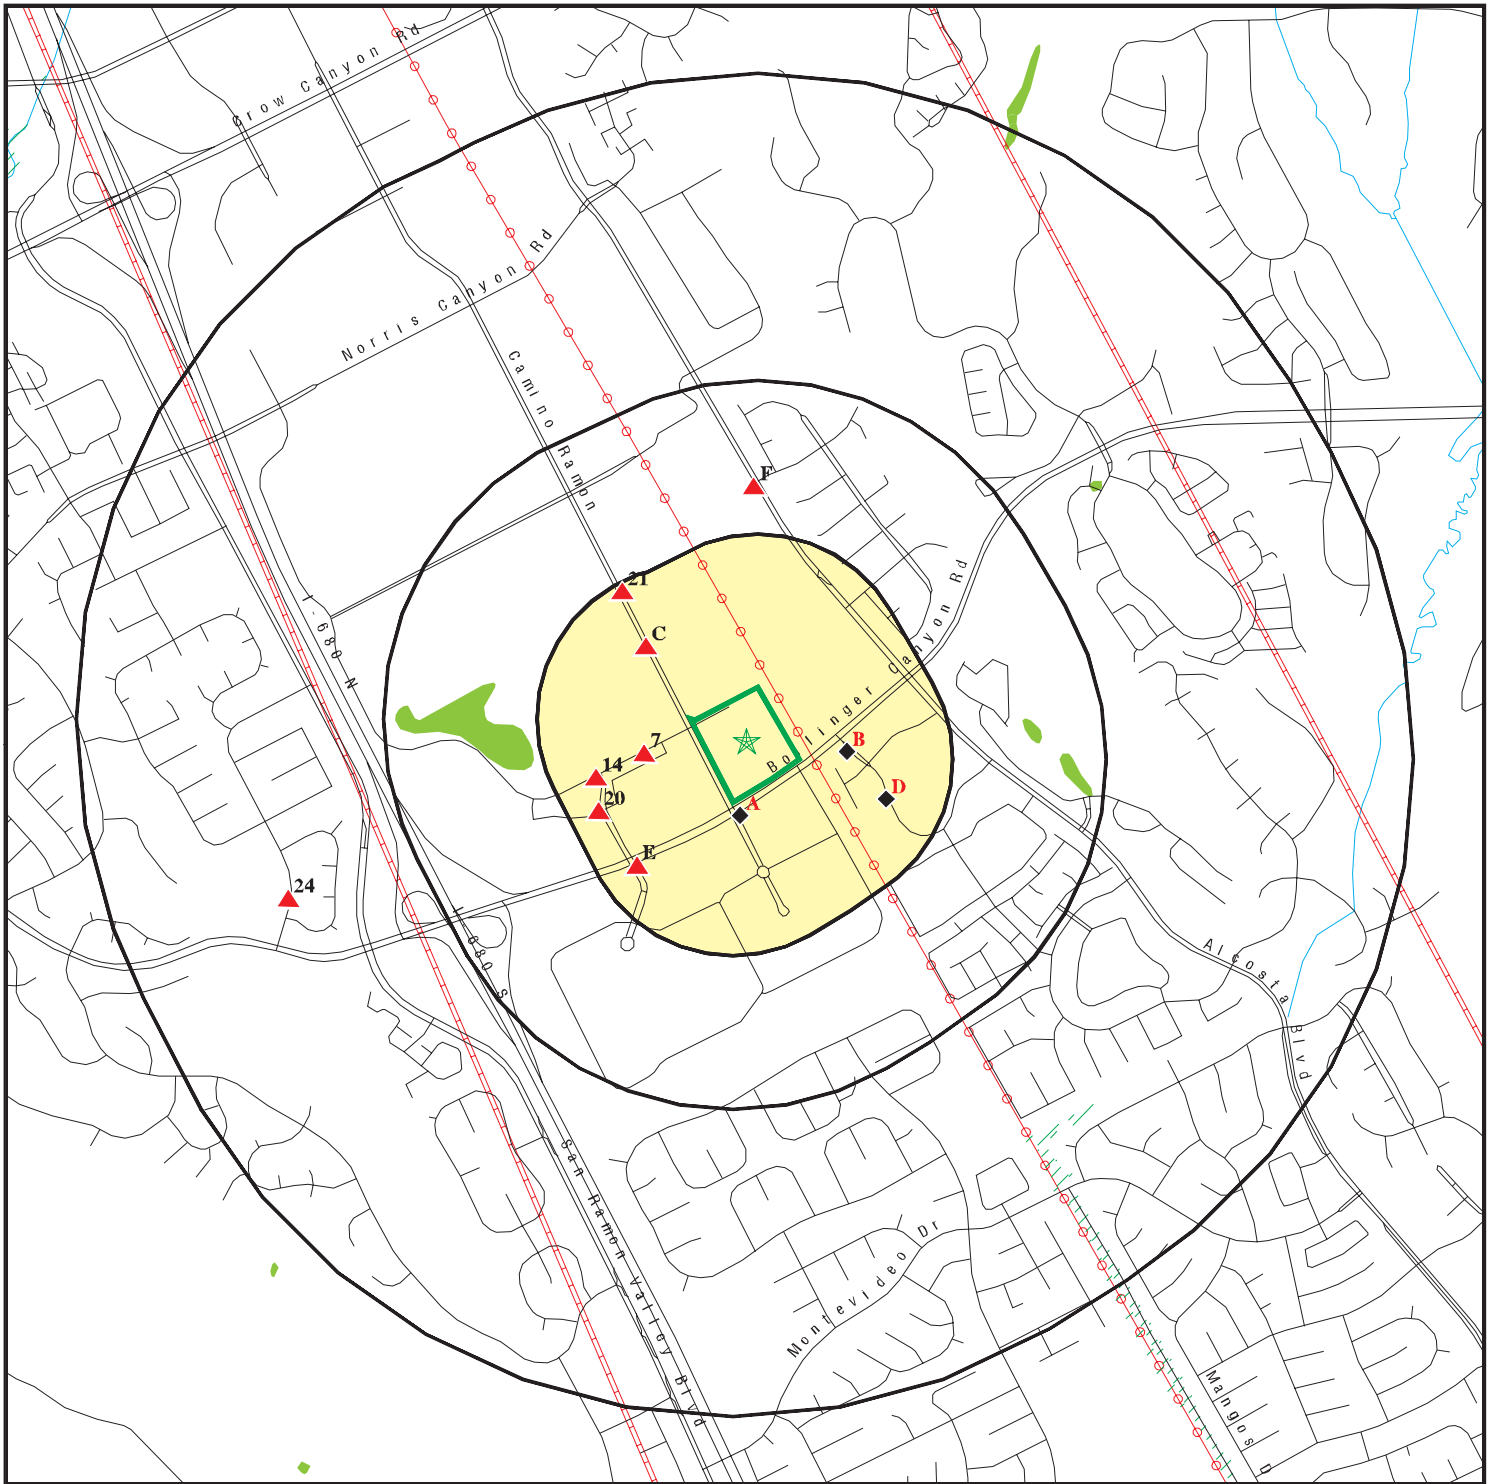

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

| Description: | 7 employees at the Pacific Bell Office complained of light headedness, nauseous for a gasoline type smell. They are being examined at scene - unknown if they will be transported to a medical facility for further evaluations. An unknown number of employees have been evacuated. She will call back with the number of evacuees. There is an underground gasoline storage tank being removed near the building. |

Environmental Interest/Information System

AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

AIR EMISSIONS CLASSIFICATION UNKNOWN

TSCA SUBMITTER

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

GREENHOUSE GAS REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 08/12/2015

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

| Target Property Map: | 5640382 DIABLO, CA |
| Version Date: | 2012 |
| South Map: | 5640384 DUBLIN, CA |
| Version Date: | 2012 |

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

| | |
|---|---|
| <u>Target Property County</u> CONTRA COSTA, CA | <u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map |
|---|---|

Flood Plain Panel at Target Property: 06013C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

| | |
|--|---|
| <u>NWI Quad at Target Property</u> DIABLO | <u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map |
|--|---|

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

| | |
|----------------|------------|
| Search Radius: | 1.25 miles |
| Status: | Not found |

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| <u>MAP ID</u> | <u>LOCATION FROM TP</u> | <u>GENERAL DIRECTION GROUNDWATER FLOW</u> |
|---------------|-------------------------|---|
| 4 | 1/2 - 1 Mile NE | Not Reported |
| 6 | 1/2 - 1 Mile NNW | Not Reported |

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: PESCADERO

Soil Surface Texture: clay loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 168 inches

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|------------------------------------|--|---|--|----------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 5 inches | clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay | Max: 4 Min: 1.4 | Max: 8.4 Min: 6.1 |
| 2 | 5 inches | 42 inches | clay | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay. | Max: 0.42 Min: 0.01 | Max: 9 Min: 7.9 |
| 3 | 42 inches | 66 inches | stratified silt loam to silty clay | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay | Max: 4 Min: 1.4 | Max: 9 Min: 7.9 |

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: CLEAR LAKE

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|--------------------|--|---|---|----------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 29 inches | clay | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay | Max: 1.4 Min: 0.42 | Max: 8.4 Min: 6.1 |
| 2 | 29 inches | 59 inches | clay | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay | Max: 1.4 Min: 0.42 | Max: 8.4 Min: 7.4 |

Soil Map ID: 3

Soil Component Name: CONEJO

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|--------------------|--|---|--|----------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 27 inches | clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay | Max: 4 Min: 1.4 | Max: 7.3 Min: 6.1 |
| 2 | 27 inches | 59 inches | clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay | Max: 4 Min: 1.4 | Max: 7.3 Min: 6.1 |

Soil Map ID: 4

Soil Component Name: BOTELLA

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish & Game

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Contact: Audrey Lundin

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Cardno ATC #75 were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Cardno ATC #75 (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquiries (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Cardno ATC #75 on Dec 28, 2015.

TARGET PROPERTY

6200 Bollinger Canyon Road
San Ramon, CA 94583

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

Contractor Name:

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeyman:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000

Permit Type: Bldg -

New Permit Number: 101000000405

Status: Valuation: \$1,000,000.00

Contractor Company: OWNER-BUILDER

Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

APPENDIX I
RESUMES

PROFESSIONAL SUMMARY

Ms. Lundin has experience performing and managing Phase I Environmental Site Assessments (ESAs), Transaction Screen Assessments (TSAs), Property Condition Assessments (PCAs), and industrial hygiene investigations. She develops report templates in support of due diligence and industrial hygiene service lines. Ms. Lundin is responsible for leading staff scientists, industrial hygienists, project managers, field technicians, and subcontractors, as well as coordinating large-scale microbial remediation oversight contracts.

PROJECT EXPERIENCE

Market Sector

- **Modified Environmental Site Assessments and FCC-Required Environmental Compliance Studies / Telecommunications Sector / California and Nevada.** Performed and managed over 200 Modified Phase I ESAs or FCC-required environmental compliance studies in support of telecommunication service expansion and antenna placement.
- **Environmental Site Assessments / Agricultural, Residential, Commercial, Industrial, and Government Sectors / Northern California.** Performed and managed ASTM-compliant ESAs in support of pending real estate transactions. Completed a Phase I ESA for a 12.9-acre site in San Rafael that was previously utilized as a manufactured gas plant, corporation yard, and gasoline service station; each of the prior uses had contributed to onsite contamination which required further action. Performed a Phase I ESA of a 123-acre site in Salinas which was previously utilized as a tire-manufacturing plant and was delisted from the National Priority List.
- **Transaction Screen Assessments / Education, Residential, Commercial, and Industrial Sectors / Northern California.** Performed and managed ASTM-compliant TSAs and developed a report template that complies with the revised ASTM standard and current SBA guidelines.
- **Property Condition Assessments / Residential, Commercial, and Industrial Sectors / Northern California.** Performed PCAs to include observation and report of the physical condition and maintenance of a property and its improvements. PCA reports addressed items significant for the continued operation of a facility in its current usage and occupancy, consistent with comparable properties of similar age. One PCA included an assessment of a 44-acre marina in Alameda which contained 10 piers, 530 berths, and approximately 37 buildings constructed between the early 1900's and 1984.
- **Combustible Materials Assessment / Data Center / San Jose, CA.** Developed a scope of work/report template and completed the combustible materials assessment. The report was well-received by City of San Jose Fire Department staff who commented on its thoroughness and accuracy.
- **Indoor Air Quality, Odor, and Microbial Investigations / Education, Residential, Commercial Industrial, and Government Sectors / Northern California.** Performed indoor air quality, odor, and microbial investigations at numerous site buildings and campuses throughout the San Francisco Bay Area. Investigations included visual inspections, HVAC inspections, collection of indoor air quality measurements, bulk and/or air sample collection, interpretation of findings and analytical results, report preparation, and site-specific remediation strategies.
- **Asbestos, Lead, and Dust Air Monitoring / Construction, Education, Residential, Commercial, and Industrial Sectors / Northern California.** Conducted air monitoring and oversight of construction, emergency spill/release cleanup, or abatement activities. Directed subcontractors and responded to emergency situations in adherence with the established scope of work. Recommended scope

modifications in response to tenant concerns. Represented the environmental consulting company at regularly scheduled board meetings regarding abatement status.

- **Limited, Comprehensive, and Demolition ACM Surveys / Education, Residential, Commercial, and Industrial Sectors / Northern California and Oregon.** Identified, quantified and sampled suspect asbestos-containing materials (ACMs). Interpreted laboratory analytical data and provided recommendations to the client, in report format, for ACM management procedures.
- **AHERA Surveys / Education Sector / Northern California.** Re-inspected asbestos-containing building materials within multiple district campuses according to AHERA protocol. Photographed areas of concern and provided recommendations to clients, in report format, for ACM management procedures.
- **Spill Prevention, Control, and Countermeasure (SPCC) Plan / Data Center / San Francisco, CA.** Completed an SPCC plan for a light industrial data center with several backup generators and aboveground storage tanks.
- **Groundwater Monitoring / Commercial and Industrial Sectors / Northern California.** Performed groundwater monitoring activities in accordance with scheduled monitoring events designed to evaluate groundwater contamination at petroleum service stations and industrial facilities.

PROFESSIONAL REGISTRATIONS

- Certified Asbestos Consultant, State of California, Division of Occupational Safety and Health (CA, #09-4483, 2009)

EDUCATION

- B.S., Environmental Science with a Biological Emphasis, University of California, Berkeley, CA, 2004

TRAINING AND CERTIFICATIONS

- OSHA 40-Hour Hazardous Waste Operations Training and Refresher (CA, 2015)
- 16-Hour Microbial Investigations, Assessments and Remediation in the Indoor Environmental Training Course conducted by ATC (CA, 2008)

Summary of Experience

Mr. Stivala has over 20 years of environmental management. He manages environmental site assessments, remedial alternative testing, and environmental support for construction and demolition projects. He is adept at negotiating environmental solutions with regulators, attorneys and clients. In his capacity as a senior environmental professional, he has managed environmental programs in the oil & gas and aviation industries. Mr. Stivala's regional experience spans California, Oregon, Washington, Florida, and Georgia.

Mr. Stivala is well-versed in the management and preparation of a range of technical reports including site investigation work plans, corrective action plans, remedial action plans, feasibility studies, site conceptual models, groundwater monitoring reports, and Phase I & II ESAs. Mr. Stivala's environmental field techniques includes drilling via hollow-stem auger, direct-push, mud rotary, air rotary, and cone penetrometer testing. He is skilled in aquifer testing media sampling. Mr. Stivala has implemented several remedial alternatives including multi-phase extraction, airsparging, bioventing, pump & treat, in situ chemical oxidation, surfactant application, and excavation.

Mr. Stivala is dedicated to protecting workers' well-being by fostering a strong culture of health and safety in the workplace. Mr. Stivala has extensive experience with behavior-based health & safety philosophies such as the Loss Prevention System. He has led near-loss investigations, performed field safety observation and feedback sessions as well as tracked company's regional use of health & safety documentation tools.

Significant Projects

- > Retail Petroleum Portfolio Management / Western U.S. From 2005 to present. Managed large portfolios for Phillips 66 Company, ConocoPhillips, ExxonMobil, and Chevron Environmental Management Company sites. Responsible for stewarding teams of project managers and scientists in the assessment and remediation of petroleum-impacted sites of varying sizes. Personally managed portfolio of over 40 projects at a time. Sites consist of bulk fuel terminals and service stations. Implemented assessment technologies, such as Membrane Interface Probe, Rapid Optical Screening Tool, and Ultraviolet Induced Fluorescence. Managed implementation of remedial alternatives including multi-phase extraction, air sparging, bio sparging, in situ chemical oxidation, and surfactant application. Presented remedial action plans to Chevron's in-house remediation review team. Versed in Chevron's Incident Reporting Protocol and have led Loss Prevention System (LPS) Near Loss Investigations, prepared Loss Prevention Observations, and led feedback sessions. Tracked company's regional use of LPS tools.
- > Airport Facility Site Assessment & Remediation / Nationwide. Managed large-scale contamination assessment and remediation projects at San Francisco, Oakland, Sacramento and Miami Airports from 1991 to 2008.

Contaminants included petroleum, chlorinated solvents, and metals. Performed jet fuel bulk storage facilities assessments at San Francisco and Oakland International Airports. Major clients include United Airlines, SFO Fuel, PS Trading, and Dade County Aviation Department. Interfaced with airport and regulatory agency officials. Coordinated “air-side” activities under expedited schedules. Performed fuel-hydrant line closures and provided environmental support for airport facilities modification projects.

- > Fractured Bedrock Investigation / San Francisco Airport. Field manager for bedrock drilling project. Supervised drilling of multilevel monitoring wells up to 500 feet deep into fractured bedrock as part of a chlorinated solvent assessment. Down-hole geophysical logging was performed to identify fracture zones. Logging included caliper, resistivity, gamma, and video logging. Wells were drilled using a mud and air rotary rig.
- > Aviation Fuel Storage Facilities Demolitions / San Francisco, Oakland Airports and Sacramento. Program manager for the decommissioning of aviation fuel distribution facilities. Orchestrated demolition of bulk jet fuel storage tank facilities and subsequent assessment and remediation. Negotiated with regulatory authorities and outside consultants. Remediation at San Francisco International Airport included excavation and in situ chemical oxidation. One project included a large excavation of soil impacted with jet fuel and PCBs.
- > Former Solvent Packaging Facility Remediation, Union City, CA. Maintained a large groundwater/soil remediation system located at a former solvent packaging facility. Chlorinated solvent contamination from the facility extended a quarter mile offsite and was captured using 22 groundwater extraction wells pumping from two separate aquifers. Air treatment was performed using a resin absorption unit.
- > Railroad Facilities Assessment and remediation/ Western United States. Managed environmental site assessment projects at Union Pacific Railroad sites in California and Oregon. Projects consisted of assessments of petroleum, solvents, metals, and pesticides contamination.

- > OSHA 40-Hour Hazardous Waste Operations Training
- > OSHA 8-Hour Hazardous Waste Operations Supervisor Training
- > Loss Prevention System (LPS) Training
- > BATC Refinery Safety Training

Address: 2400 Camino Ramon, Suite 360 **Fax #:** 925-463-2559

San Ramon, CA 94583 **E-mail:** audrey.lundin@cardno.com

I am requesting the following public record(s) from Contra Costa Health Services Hazardous Materials Programs.

RECORD(S) REQUESTED: (Use additional form (s) if more space is needed)

6200 Bollinger Canyon Road, San Ramon – HAZMAT, AST, UST,

inspection, violation, release, etc. (active or inactive sites)

Our records are available electronically. Please choose one of the methods below:

Please copy the record(s) and send FedEx to the above mailing address.
The cost is \$15.00 and is payable by check or credit card (Visa or M/C).

Please copy the record(s) and notify me when ready for pick up.
The cost is \$3.00 and is payable by check or cash (**MUST BE EXACT**).

If you would like us to provide a list of sites in our database, please choose:

Please copy all “Active” or “Inactive” sites from database Cost: \$15.00

You may email the completed form to ccchazmat@hsd.cccounty.us, or mail or hand deliver to Contra Costa Health Services Hazardous Materials Programs @ 4585 Pacheco Blvd., Suite 100, Martinez, CA 94553; or FAX to (925) 646-2073.

Dear Mr. Lundin:

We have received your Public Records Act Request for information from the Department of Toxic Substances Control.

After a thorough review of our files we have found that no such records exist at this office pertaining to the site(s) referenced above.

We would like to inform you about Envirostor, a database that provides information and documents on over 5,000 DTSC cleanup sites. EnviroStor can be accessed at: <http://www.envirostor.dtsc.ca.gov/public>. Also, a computer is available in the Central Files of each DTSC Regional Office for use by community members to view EnviroStor.

If you have any questions, would like further information regarding your request or would like an appointment to visit Berkeley's Central Files, please contact me at (510) 540-3800.

Sincerely,

Liang Yu Ma

To: Audrey Lundin
Subject: Records Request

Hi Audrey:

We have no records for 6200 Bollinger Canyon Rd, San Ramon. Our records go back to 1986, anything prior to that would be the jurisdiction of the local fire department.

Happy Holidays,

EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
 Web Soil Survey URL: <http://websoilsurvey.nrcs.usda.gov>
 Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Contra Costa County, California
 Survey Area Data: Version 12, Sep 18, 2015

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jun 11, 2015—Jun 17, 2015

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

| Contra Costa County, California (CA013) | | | |
|---|--|--------------|----------------|
| Map Unit Symbol | Map Unit Name | Acres in AOI | Percent of AOI |
| Cc | Clear Lake clay, 0 to 15 percent slopes, MLRA 15 | 4.9 | 45.2% |
| CeA | Conejo clay loam, 0 to 2 percent slopes | 2.0 | 18.0% |
| Pb | Pescadero clay loam | 4.0 | 36.7% |
| Totals for Area of Interest | | 10.9 | 100.0% |

Contra Costa County, California

Cc—Clear Lake clay, 0 to 15 percent slopes, MLRA 15

Map Unit Setting

National map unit symbol: 2vbsq
Elevation: 0 to 1,060 feet
Mean annual precipitation: 13 to 32 inches
Mean annual air temperature: 57 to 61 degrees F
Frost-free period: 260 to 300 days
Farmland classification: Prime farmland if irrigated

Map Unit Composition

Clear lake and similar soils: 85 percent
Minor components: 15 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Clear Lake

Setting

Landform: Basin-floor remnants
Landform position (three-dimensional): Tread
Down-slope shape: Linear
Across-slope shape: Linear
Parent material: Clayey alluvium derived from metamorphic and sedimentary rock

Typical profile

Ap - 0 to 5 inches: clay
Ass - 5 to 20 inches: clay
Bss - 20 to 30 inches: clay
Bkss1 - 30 to 46 inches: clay
Bkss2 - 46 to 60 inches: clay

Properties and qualities

Slope: 0 to 15 percent
Depth to restrictive feature: More than 80 inches
Natural drainage class: Poorly drained
Runoff class: High
Capacity of the most limiting layer to transmit water (Ksat):
Moderately low to moderately high (0.06 to 0.20 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: Rare
Frequency of ponding: Frequent
Calcium carbonate, maximum in profile: 4 percent
Salinity, maximum in profile: Nonsaline to very slightly saline (0.5 to 3.0 mmhos/cm)
Sodium adsorption ratio, maximum in profile: 7.0
Available water storage in profile: Moderate (about 8.6 inches)

Interpretive groups

Land capability classification (irrigated): 2w

Land capability classification (nonirrigated): 4w

Hydrologic Soil Group: C

Minor Components

Pescadero

Percent of map unit: 4 percent

Landform: Depressions

Cropley

Percent of map unit: 4 percent

Conejo

Percent of map unit: 4 percent

Unnamed

Percent of map unit: 3 percent

Landform: Strand plains

Data Source Information

Soil Survey Area: Contra Costa County, California

Survey Area Data: Version 12, Sep 18, 2015

Contra Costa County, California

CeA—Conejo clay loam, 0 to 2 percent slopes

Map Unit Setting

National map unit symbol: h98j
Elevation: 10 to 1,000 feet
Mean annual precipitation: 14 to 25 inches
Mean annual air temperature: 59 degrees F
Frost-free period: 260 to 300 days
Farmland classification: Prime farmland if irrigated

Map Unit Composition

Conejo and similar soils: 85 percent
Minor components: 15 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Conejo

Setting

Landform: Valleys
Landform position (three-dimensional): Talf
Down-slope shape: Linear
Across-slope shape: Linear
Parent material: Alluvium derived from sedimentary rock

Typical profile

H1 - 0 to 27 inches: clay loam
H2 - 27 to 60 inches: clay loam

Properties and qualities

Slope: 0 to 2 percent
Depth to restrictive feature: More than 80 inches
Natural drainage class: Well drained
Runoff class: Low
Capacity of the most limiting layer to transmit water (Ksat):
Moderately high (0.20 to 0.57 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Salinity, maximum in profile: Nonsaline to very slightly saline (0.0 to 2.0 mmhos/cm)
Available water storage in profile: High (about 11.4 inches)

Interpretive groups

Land capability classification (irrigated): 1
Land capability classification (nonirrigated): 4c
Hydrologic Soil Group: C

Minor Components

Botella

Survey Area Data: Version 12, Sep 18, 2015

Contra Costa County, California

Pb—Pescadero clay loam

Map Unit Setting

National map unit symbol: h9bb

Elevation: 10 to 100 feet

Mean annual precipitation: 14 to 19 inches

Mean annual air temperature: 59 degrees F

Frost-free period: 260 to 280 days

Farmland classification: Not prime farmland

Map Unit Composition

Pescadero and similar soils: 85 percent

Minor components: 10 percent

Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Pescadero

Setting

Landform: Rims, valleys

Landform position (two-dimensional): Toeslope

Landform position (three-dimensional): Rise, talf

Down-slope shape: Linear

Across-slope shape: Linear

Parent material: Alluvium derived from sedimentary rock

Typical profile

H1 - 0 to 5 inches: clay loam

H2 - 5 to 43 inches: clay

H3 - 43 to 66 inches: stratified silt loam to silty clay

Properties and qualities

Slope: 0 to 2 percent

Depth to restrictive feature: More than 80 inches

Natural drainage class: Poorly drained

Runoff class: Medium

Capacity of the most limiting layer to transmit water (Ksat): Very low to moderately low (0.00 to 0.06 in/hr)

Depth to water table: About 60 to 72 inches

Frequency of flooding: Rare

Frequency of ponding: Rare

Calcium carbonate, maximum in profile: 10 percent

Salinity, maximum in profile: Strongly saline (16.0 mmhos/cm)

Sodium adsorption ratio, maximum in profile: 160.0

Available water storage in profile: Moderate (about 7.4 inches)

Interpretive groups

Land capability classification (irrigated): 4s

Land capability classification (nonirrigated): 4s

Hydrologic Soil Group: D

Minor Components

Clear lake

Percent of map unit: 10 percent

Landform: Basin floors

Landform position (two-dimensional): Toeslope

Landform position (three-dimensional): Talf

Down-slope shape: Linear

Across-slope shape: Linear

Soil Survey Area: Contra Costa County, California

Survey Area Data: Version 12, Sep 18, 2015

EAST BAY MUNICIPAL UTILITY DISTRICT

2014 ANNUAL WATER QUALITY REPORT

DROUGHT ALERT

Our water supply is critically low for 2015.

The drought continues. Tougher measures and more emergency supplies are needed. Please visit ebmud.com/drought for the latest information on water supplies and tips to conserve.

EBMUD is proud to report that in 2014, your drinking water surpassed every state and federal public health requirement.

YOUR WATER

In the East Bay, 1.3 million customers rely on high-quality EBMUD water. Almost all of EBMUD's water comes from the 577-square mile watershed of the Mokelumne River on the western slope of the Sierra Nevada. This area is mostly national forest, EBMUD-owned lands and other undeveloped lands little affected by human activity.

The Mokelumne watershed collects snowmelt from Alpine, Amador and Calaveras counties, which flows into Pardee Reservoir near the town of Valley Springs. During times of high water demand, system maintenance or for operational needs, EBMUD may draw water from local watersheds. During drought emergencies, EBMUD may use water from the Sacramento River to meet customer needs.

Three large aqueducts carry water 90 miles from Pardee Reservoir to the East Bay. EBMUD's network of reservoirs, pipelines, pumps and water treatment plants are put to work to provide great water quality every day, as reflected in this report.

Dismal precipitation in 2014 meant EBMUD reservoirs did not refill back to normal levels. EBMUD used supplemental water supplies from the Sacramento River for the first time.

In early summer, 23,000 acre-feet of Sacramento River water was diverted into Upper San Leandro and San Pablo reservoirs in the East Bay — about a month's supply. A half-billion dollar investment by ratepayers for dry-year infrastructure combined with solid efforts by customers to conserve precious water helped us weather one of the driest years in California history. Drought conditions have worsened. Visit ebmud.com/drought for the latest news.

HOW WE MANAGE WATER QUALITY

Regardless of source, all water is treated at an EBMUD water treatment plant before it reaches your tap.

EBMUD takes many steps to ensure high water quality including managing watershed lands and reservoirs, treating the water, operating a complex distribution system, maintaining facilities and addressing customer concerns.

In laboratories and in the field, EBMUD samples and tests your water extensively to ensure it is safe to drink. We look for more than 100 substances including microorganisms, pesticides, herbicides, asbestos, lead, copper, petroleum products and by-products of industrial and water treatment processes. More than 20,000 laboratory tests each year ensure the safety of your drinking water.

WHERE YOUR WATER IS TREATED

Most of the year, your drinking water comes from Pardee Reservoir in the Sierra Nevada mountains. Before reaching your tap, most water is treated at a facility in Walnut Creek, Orinda or Lafayette.

Some parts of EBMUD's service area draw water year-round from EBMUD's Sierra Nevada supply. During times of high water

demand, system maintenance or for operational needs, drinking water may come from local watersheds and may be treated at a different facility. Some customers receive water from multiple sources at different times of the year.

WHAT WAS DETECTED AND REPORTED

In 2014, EBMUD treated raw water from multiple sources, including Sacramento River water, and consistently provided high-quality drinking water, surpassing every public health requirement set by the State Water Resources Control Board (State Board) and the U.S. Environmental Protection Agency.

Drinking water requirements were formerly set by the California Department of Public Health. On July 1, 2014, the Drinking Water Program was transferred to the State Board.

The tables on the following pages show the measured amounts of contaminants detected in 2014 or in the most recent year sampling was required. Water is sampled in EBMUD's source waters, at water treatment plants, in the distribution system or at customers' taps.

Although EBMUD tests for more than 100 substances, this report only lists those detected at or above the state or federal level required for reporting. In this case, no news is good news!

Table 1 – Regulated for public health

These contaminants are regulated to protect your health. They have maximum contaminant levels, known as primary MCLs, set by the State Board or U.S. Environmental Protection Agency. These levels are set as close to the established public health goals as is economically and technologically feasible.

Table 2 – Regulated for drinking water aesthetics

These contaminants are regulated to maintain aesthetic standards to maintain the odor, taste and appearance of drinking water. They have maximum contaminant levels, also known as secondary MCLs, set by the State Board.

Table 3 – Unregulated with no established maximum contaminant level

Water agencies are required to report these contaminants if detected, but no maximum contaminant levels have been established by the State Board or U.S. Environmental Protection Agency.

Table 4 – Other parameters of interest to customers

These water measurements, such as pH, hardness and alkalinity, may be of interest to customers.

ARE YOU READY FOR A WATER EMERGENCY?

Natural disasters or other emergencies can temporarily cut off the East Bay's water supply or affect water quality. Be prepared with your own supplies until water is restored. This will be your water supply while emergency management agencies set up temporary water distribution in your community.

You need one to two gallons per day per person for at least 3-7 days. Store extra water for pets and frequent visitors. Store water in clean, airtight, food-grade plastic containers and keep in a dark, cool place.

In case of a water quality emergency, be prepared to disinfect your tap water. In your emergency kit include a heat source, such as a camping stove, plus a clean pot to boil water for two minutes before consuming. If power supplies are disrupted or boiling water is not possible, disinfect your water with 1/4 teaspoon (16 drops) of liquid bleach per gallon of water and then let stand for 30 minutes. Add measuring spoons, a clean medicine dropper and a sealed bottle of regular, unscented liquid bleach to your emergency supplies.

HOW TO READ THE WATER QUALITY TABLE

Find your location on the map on page 2. Note which water treatment plant(s) serve that area.

- Go to the table on page 4 to find the contaminant you are interested in.
- Column two notes the unit of measurement.
- Column three lists the most recent year the contaminant was tested.
- Column four lists the state or federal goal. At that amount or lower, there is no known or expected risk to health from its presence in drinking water. Not all listed contaminants have goals set by the California or US Environmental Protection Agency.
- Column five notes the highest amount the State Board or U.S. Environmental Protection Agency allows. This amount is usually not as low as the public health goal in column four.
- Column six lists the average amount detected across the EBMUD service area or at designated locations.
- Find the column that corresponds to the water treatment plant(s) that serve you. This is the amount of the contaminant detected in your area's water. All reported contaminants were detected at amounts lower than the highest amount allowed (column 5) by the State Board and U.S. Environmental Protection Agency.
- The last column lists how the contaminant typically gets into your drinking water.

EBMUD 2014 ANNUAL WATER QUALITY REPORT

In 2014, your drinking water was consistently the highest quality, surpassing every public health requirement set by the State Water Resources Control Board (State Board), Division of Drinking Water and the U.S. Environmental Protection Agency.

KEY TERMS

- AL** Regulatory action level. The concentration which, if exceeded, triggers treatment or other requirements that a water system must follow.
- DBP** Disinfection by-products. These are formed when chlorine and/or ozone reacts with natural constituents in water. Trihalomethanes (THMs), haloacetic acids (HAAs), chlorate, and bromate are disinfection by-products.
- MCL** Maximum contaminant level. The highest level of a contaminant that is allowed in drinking water. Primary MCLs are set as close to the PHGs or MCLGs as is economically and technologically feasible. Secondary MCLs address odor, taste and appearance of drinking water.
- MCLG** Maximum contaminant level goal. The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs are set by the U.S. Environmental Protection Agency.
- MRDL** Maximum residual disinfectant level. The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial pathogens.
- MRDLG** Maximum residual disinfectant level goal. The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial pathogens.
- Notification level** A health-based advisory level established by the State Board for chemicals in drinking water that lack MCLs.
- Primary drinking water standard** These standards regulate contaminants that affect health by setting MCLs and MRDLs along with their monitoring, reporting and water treatment requirements.
- PHG** Public health goal. The level of a contaminant in drinking water below which there is no known or expected risk to health. Public health goals are set by the California Environmental Protection Agency.
- TOC** Total organic carbon. A measure of organic compounds that are present in the water.
- Turbidity** A measure of the cloudiness of water. Turbidity is monitored because it is a good indication of the effectiveness of our filtration systems.
- TT** Treatment technique. A required process intended to reduce the level of a contaminant in drinking water.
- 90th percentile** A measure that indicates 90 percent of the samples had a lower result.

ABBREVIATIONS

- gpg** grains per gallon
- NA** not applicable
- NL** notification level
- NTU** nephelometric turbidity unit, a measure of the cloudiness of water.
- pCi/L** picocuries per liter, a measure of radioactivity.
- ppm** parts per million. One ppm is like 32 seconds in one year.
- ppb** parts per billion. One ppb is like 3 seconds in 100 years.
- ppt** parts per trillion. One ppt is like 3 seconds in 100,000 years.
- TON** threshold odor number, a measure of odor in water.
- µS/cm** microsiemens per centimeter, a measure of electrical conductance.

NOTES

a) Chloramine residuals in the distribution system are measured as an equivalent quantity of chlorine. When the chloramine residual cannot be detected, the sample is further analyzed to ensure that microbiological water quality is in compliance with the regulations. **b)** Highest running annual average. **c)** EBMUD is required by state law to add fluoride to drinking water to help prevent dental decay in consumers. Current regulations require that fluoride

levels in the treated water be maintained between 0.7 to 1.4 ppm with an optimum dose of 0.8 ppm. Our monitoring showed that the fluoride levels in the treated water distribution system ranged from 0.05 to 1.0 ppm with an average of 0.8 ppm. Information about fluoridation, oral health and current issues is available at www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/Fluoridation.shtml. **d)** See page 7 for additional

information about lead and chromium in drinking water. **e)** Highest locational running annual average. **f)** Sampling locations are chosen to represent worst-case scenarios. **g)** All hexavalent chromium samples are in compliance with the new California MCL of 10 ppb. **h)** Sobrante water treatment plant was not in service when *Cryptosporidium* was detected.

* Grains per gallon (gpg) is a measure of water hardness. Knowing the amount can help improve the function of dishwashers, cooling equipment and other industrial processes. Refer to your appliance manufacturer's instruction manual for the optimum grains per gallon level.

WATER QUALITY REGULATIONS

In order to ensure that tap water is safe to drink, the U.S. Environmental Protection Agency and the State Water Resources Control Board (State Board) prescribe regulations that limit the amount of certain contaminants in water provided by public water systems. State Board regulations also establish limits for contaminants in bottled water.

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

Microbial contaminants, such as viruses, bacteria and protozoa, such as *Cryptosporidium*, that may come from sewage treatment plants, septic systems, agricultural livestock operations and wildlife.

Inorganic contaminants, such as salts and metals, that can be naturally-occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining or farming.

Synthetic organic contaminants, such as pesticides and herbicides that may come from a variety of sources, including agriculture, urban storm water and residential uses.

Volatile organic chemical contaminants from industrial processes and petroleum production, and from gas stations, urban storm water runoff, agricultural application and septic systems.

Radioactive contaminants that can be naturally occurring or be the result of oil and gas production and mining activities.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants

and potential health effects is available from the U.S. Environmental Protection Agency's Safe Drinking Water Hotline at 800-426-4791 or online at www.epa.gov/safewater. Contact your healthcare provider or visit the Centers for Disease Control and Prevention website for guidelines on using tap water for health or medical purposes.

Cryptosporidium

Cryptosporidium is a microbial contaminant found in surface water throughout the United States. Although filtration is highly effective in removing *Cryptosporidium*, the most commonly used filtration methods cannot guarantee 100 percent removal.

Our monitoring indicates the presence of these organisms in one of our source waters. Current test methods cannot determine if the organisms are dead or are capable of causing disease. Ingestion of *Cryptosporidium* may cause abdominal infection with symptoms including nausea, diarrhea and abdominal cramps.

Cryptosporidium must be ingested to cause disease, and it may be spread through means other than drinking water. Most healthy individuals can overcome the disease within a few weeks. However, immuno-compromised people, infants and small children, and the elderly are at greater risk of developing life-threatening illness. We encourage these individuals to consult their physician regarding appropriate precautions to take to avoid infection.

Populations with low resistance

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, and some elderly and some infants can be particularly at risk to infections.

These people should seek advice about drinking water from their health care providers. USEPA/Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the USEPA Safe Drinking Water Hotline at 800-426-4791 or www.epa.gov/safewater.

REPORT A WATER QUALITY CONCERN

Do you have a question or concern about your water quality? If so call 866-403-2683. EBMUD inspectors respond to calls within one day regarding water which appears dirty, colored, or has foreign particles or unusual taste or odor.

Lead in drinking water

If present, elevated levels of lead can cause serious health problems. Pregnant women, infants and young children are typically more vulnerable to lead in drinking water than the general population.

Lead in drinking water is primarily from materials and components associated with lead service lines and home plumbing. EBMUD has replaced all lead water lines in its service area, but you may have lead in your home plumbing. It is possible that lead levels at your home may be higher than at other homes in the community as a result of materials used in your home's plumbing.

If you are concerned about elevated lead levels in your home's water, you may wish to have your water tested. If your water has been sitting for several hours, you can minimize the potential for lead exposure by running your faucet for 30 seconds to 2 minutes before using water for drinking or cooking. Capture and reuse this water for other uses such as watering ornamental plants.

Information on lead in drinking water, testing methods and steps you can take to minimize exposure is available from the U.S. Environmental Protection Agency Safe Drinking Water Hotline at 800-426-4791 or online at www.epa.gov/safewater/lead.

Fluoride and infant formula

Water fluoridation is a widely accepted practice and mandated by state law. It is proven to be safe and effective for preventing and controlling tooth decay. According to the American Dental Association and Centers for Disease Control and Prevention (CDC), it is safe to use optimally fluoridated water for preparing infant formula. If an infant is primarily fed infant formula prepared with fluoridated water, there may be an increased chance for mild enamel fluorosis, but enamel fluorosis does not affect the health of the infant or the health of the infant's teeth. To lessen this chance, deionized, purified, distilled or demineralized bottled water can be used some of the time to prepare infant formula.

If you have additional questions about fluoride, contact your health provider. Additional information can be found at the State Board www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/Fluoridation.shtml or the CDC www.cdc.gov/fluoridation websites.

Chromium

Chromium is found naturally in the environment, in two forms: trivalent and hexavalent chromium. Both forms of chromium find their way into bodies of water through mineral deposits. Hexavalent chromium is also a byproduct of industrial manufacturing. Trivalent chromium is an essential human dietary element. When ingested, hexavalent chromium is a suspected carcinogen.

Currently, trivalent and hexavalent chromium are regulated together by the federal and state agencies. As of July 1, 2014, there is also a California maximum contaminant level (MCL) for hexavalent chromium of 10 parts per billion. EBMUD monitors for total chromium at our five treatment plants. Beginning in October 2013, EBMUD began collecting samples for hexavalent chromium. EBMUD is in compliance with the California MCL and will continue to meet all regulatory requirements.

GENERALIZED GEOLOGIC
MAP OF CALIFORNIA

Geologic maps show the distribution of rocks exposed at the surface of the earth as well as other geologic information. Rocks are grouped according to age and origin on the map. Age of the rocks is considered to be the geologic time at which the rock formed (see Geologic Time Scale on back page). Rocks are classified according to their origin:

1) sedimentary rocks form as accumulations of mineral material in oceans (marine) or on continents (continental); 2) igneous rocks form by crystallization of minerals from molten rock. Molten rock beneath the earth's surface is called magma. Magma cools slowly to form coarse-grained igneous rocks such as granite. Molten rock erupted on the earth's surface from volcanoes is called lava and forms volcanic rocks; 3) metamorphic rocks form from preexisting rocks by mineralogical, chemical, and/or structural changes. Other geologic information shown on geologic maps includes structural features such as faults. Faults are fractures in the earth's crust where rocks have moved relative to each other.

The map shown here is generalized from more detailed, larger scale maps. On this map, rocks exposed in California are placed in one of seven units:

Quaternary sedimentary rocks. Gravel, sand, silt, and clay deposited mostly in valleys and lowlands onshore. There are some marine sedimentary rocks of this age in California.

Tertiary sedimentary rocks. Sandstone, shale, and conglomerate usually deposited in relatively shallow marine water near the continental margin. These rocks are exposed mostly in the coastal regions of California.

Tertiary and Quaternary volcanic rocks. Lava flows erupted from volcanoes. These rocks make up much of the Cascade Range and the Modoc Plateau, and are widespread in eastern California. They also occur in coastal regions.

Mesozoic sedimentary rocks. Sandstone and shale that were deposited mostly in the ocean. The rocks make up the bulk of the Coast Ranges. They also occur in coastal southern California.

Mesozoic granitic rocks. A wide variety of coarse-grained igneous rocks formed when magma that intruded the earth's crust cooled and was later exposed by erosion. Granitic rocks occur throughout the state, but are most common in the mountainous areas such as the Klamath Mountains, the Sierra Nevada, and the Peninsular Ranges. Some granitic rocks are Cenozoic, Paleozoic, and Precambrian.

Mesozoic and Paleozoic metamorphic rocks. Metasedimentary and metavolcanic rocks that make up much of the Klamath Mountains and the Sierran foothills. They are also common in the Basin and Range, the Mojave Desert, the Transverse Ranges, and the Peninsular Ranges.

Serpentinized ultramafic rocks. A special type of rock that does not fit into the three common categories of rocks. The most common rock is serpentine, the California state rock (see CGS Note 14).

Environmental Professional Statement:

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in § 312.10 part of 40 CFR 312. We have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Senior Reviewer, Environmental Professional

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Bishop Ranch
 2600 Camino Ramon
 San Ramon, California 94583

1.2 Findings and Conclusions Summary

ATC has performed this Phase I Environmental Site Assessment (ESA) of the property in conformance with the scope and limitations of ASTM Standard Practice E1527-13. Any exceptions to, or deletions from, this practice are described in Section 2.0 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the property. The table below provides a summary of report findings and conclusions.

| FINDINGS AND CONCLUSIONS SUMMARY | | | | | | |
|----------------------------------|---|----------------------|-----------------|----------------|--------------------------|--|
| Report Section | Further Action? | De minimis Condition | REC and/or CREC | Historical REC | ASTM Non-Scope Condition | Description |
| 4.0 | User Provided Information | No | | | | |
| 5.1.1 | Federal Database Findings | No | | | | |
| 5.1.2 | State and Tribal Database Findings | No | X | | | The property is listed within the California Hazardous Material Incident Reporting System (CHMIRS) database for three hazardous material incidents. Refer to Note 1. |
| 5.1.3 | Local Environmental Record Sources | No | | X | | A Uniform Hazardous Waste Manifest revealed oil-contaminated soil was removed from the property in 1991. Refer to Note 2. |
| 5.3 | Historical Records Sources | No | | | | |
| 6.2 | Hazardous Substance Use, Storage and Disposal | No | | | | |
| 6.3 | Underground Storage Tanks | No | | X | | In 2001, a 12,000-gallon gasoline UST was removed from the property. Refer to Note 3. |
| 6.4 | Aboveground Storage Tanks | No | | | | |
| 6.5 | Other Petroleum Products | No | | | | |
| 6.6 | Polychlorinated Biphenyls (PCBs) | No | | | | |
| 6.7 | Unidentified Substance Containers | No | | | | |
| 6.8 | Nonhazardous Solid Waste | No | | | | |
| 6.9 | Wastewater | No | | | | |

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Bishop Ranch
2600 Camino Ramon
San Ramon, California 94583

| FINDINGS AND CONCLUSIONS SUMMARY | | | | | | | |
|----------------------------------|------------------------------------|----------------------|-----------------|----------------|--------------------------|--|--|
| Report Section | Further Action? | De minimis Condition | REC and/or CREC | Historical REC | ASTM Non-Scope Condition | Description | |
| 6.10 | Waste Pits, Ponds and Lagoons | No | | | X | According to the United States Fish and Wildlife National Wetlands Inventory, the West Lake is designated as a freshwater pond. Based on the fact that the property is already developed, this designation is not considered to represent an environmental concern to the property at this time. | |
| 6.11 | Sumps | No | | | | | |
| 6.12 | Septic Systems | No | | | | | |
| 6.13 | Stormwater Management System | No | | | | | |
| 6.14 | Wells | No | | | | | |
| 7.0 | Subsurface Vapor Migration | No | | | | | |
| 8.0 | Interviews | No | | | | | |
| 9.1 | Asbestos-Containing Material (ACM) | No | | | | | |
| 9.2 | Radon | No | | | | | |
| 9.3 | Lead in Drinking Water | No | | | | | |
| 9.4 | Lead-Based Paint (LBP) | No | | | | | |
| 9.5 | Mold Screening | No | | | | | |
| 9.6 | Additional User Requested Services | No | | | | | |

Note 1: The property is listed within the CHMIRS database for three hazardous material incidents. In 2001, employees were complaining of light-headedness from gasoline fumes emitted during a UST removal taking place at the property. The UST was closed under the oversight of the Contra Costa County Environmental Health Department with no further assessment required. The second incident occurred in 2008 when 15 gallons of hydraulic oil was released from a trash compactor located in the property basement. The hydraulic oil release occurred on concrete and was cleaned up using absorbent. No soil and/or groundwater impacts occurred due to this release. In 2012, during the testing of an onsite generator, the day storage tank overflowed into the containment area. A licensed contractor responded to the incident. During the cleanup, it was discovered that some of the diesel fuel spilled into an onsite sump. The sump was pumped out. The spill was reportedly contained on the facility. No impacts to soil and/or groundwater were reported. Based on the lack of reported impacts to soil and/or groundwater, these hazardous material incidents are considered to be *de minimis conditions* which require no further assessment at this time.

Note 2: ATC reviewed files for the property at the California Department of Toxic Substance Control (DTSC) office on November 21, 2013. A Uniform Hazardous Waste Manifest, dated April 22, 1991, revealed that 18 yards of Non-RCRA Hazardous Waste Solid (oil-contaminated soil) was removed from the property. Details regarding the location of the excavated oil-contaminated soil were not provided. In addition, no incident of release was reported for the property. Based on the current regulatory status and the information provided within the Uniform Hazardous Waste Manifest, ATC concludes that the removal of the oil-contaminated soil from the property represents a *historical recognized environmental condition* which requires no further assessment at this time.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Bishop Ranch
2600 Camino Ramon
San Ramon, California 94583

Note 3: The gasoline UST was used for fueling fleet vehicles operated by Pacific Bell. No soil or groundwater impacts are reported. The UST was closed under the oversight of the Contra Costa County Environmental Health Department with no further assessment required. Based on the regulatory closure status of the property's former UST, this listing is considered to be a *historical recognized environmental condition* which requires no further assessment at this time.

1.3 Significant Data Gap Summary

Data gaps may have been encountered during the performance of this Phase I ESA and are discussed within the section of the report where they were encountered. However, according to ASTM Standard Practice E1527-13, data gaps are only significant if "other information and/or professional experience raise reasonable concerns involving the data gap." As the following represents, there are no significant data gaps.

| SIGNIFICANT DATA GAP SUMMARY | | |
|------------------------------|--|--|
| Report Section | | Description |
| 3.5 | Current Uses of Adjoining Properties | No <i>significant data gap</i> identified. |
| 4.2 | Environmental Liens or Activity and Use Limitations (AULs) | No <i>significant data gap</i> identified. |
| 5.1 | Standard Environmental Records | No <i>significant data gap</i> identified. |
| 5.2 | Physical Setting Sources | No <i>significant data gap</i> identified. |
| 5.3 | Historical Records Sources | No <i>significant data gap</i> identified. |
| 6.1 | Methodology and Limiting Conditions | No <i>significant data gap</i> identified. |
| 7.0 | Interviews | No <i>significant data gap</i> identified. |

1.4 Recommendations

Based on information collected from the Phase I ESA, ATC offers the following recommendations:

- As discussed in Section 5.3.9, asbestos was previously identified in June 2016 in the form of 5% asbestos in samples of the black floor tile mastic. In August and September of 2016, Patriot Environmental Laboratory Services, Inc. performed clearance air sampling and all PCM clearance results indicate the asbestos fiber levels were below the EPA recommended clearance criteria of 0.01 fibers per cubic centimeter of air.

ATC notes the building was constructed in 1984 making the presence of Asbestos Containing Material (ACM) in the building unlikely. However, the potential always remains that asbestos could be present in an installed building component, finished surface or fixture due to the lack of a ban on certain asbestos-containing products, a manufacturing error, imported products or the use of old products; even though experience indicates this is not a common occurrence. Irrespective of industry experience, the Occupational Safety and Health Administration (OSHA), and the EPA's asbestos National Emissions Standards for Hazardous Air Pollutants (NESHAP) regulations requires testing of building materials in advance of renovation or demolition of building components, finished surfaces or fixtures regardless of age. This report recommends compliance with the referenced Federal law and those of State/Local agencies.

- Based on the construction date of the property, a survey for the presence of Lead Based Paint LBP on painted surfaces was not included in the scope of this ESA. Painted surfaces were observed to be in generally good condition at the time of the site reconnaissance.

As discussed in Section 5.3.9, lead was noted in several building materials according to a sampling in June 2016. Subsequent to the testing, a Lead-In-Construction Compliance Plan (Plan) was developed to comply with Federal and California Construction Lead Standards. The Plan provided

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Bishop Ranch
2600 Camino Ramon
San Ramon, California 94583

general control and work practices, personal protective equipment, and exposure monitoring for lead construction materials. ATC recommends compliance with the Plan. In addition, a comprehensive survey for the presence of LBP on painted surfaces is recommended prior to any demolition, construction and/or remodeling activities.

- ATC conducted a screening survey for readily observable mold and conditions conducive to mold on the property. The screening consisted of limited interview, document review and physical observation. ATC did not observe any evidence of mold or moisture intrusion during the reconnaissance.

ATC interviewed the site contact, Mr. Jeff Finazzo, regarding potential mold conditions at the property. Mr. Finazzo provided the reports discussed in Section 5.3.9. The information documents the cleaning of the fan rooms and plenum rooms due to dark or black material found on the fans in October 2015. The daily field reports note that the site passed the semi-aggressive air testing and can be released for re-occupancy. ATC recommends that periodic visual assessments for the presence of mold on the fans be incorporated into the operation and maintenance plans for the building.

2.0 INTRODUCTION

2.1 Purpose

The purpose of this Phase I ESA was to identify recognized environmental conditions in connection with the property at the time of the site reconnaissance. The scope of work for this Phase I ESA may also include certain potential environmental conditions beyond the scope of ASTM Standard Practice E1527-13 as listed below. This report documents the findings, opinions and conclusions of the Phase I ESA.

2.2 Scope

This Phase I ESA was conducted in general accordance with the ASTM Standard Practice E1527-13, consistent with a level of care and skill ordinarily practiced by the environmental consulting profession currently providing similar services under similar circumstances. Significant additions, deletions or exceptions to ASTM Standard Practice E1527-13 are noted below or in the corresponding sections of this report. The scope of this assessment included an evaluation of the following:

- Physical setting characteristics of the property through a review of referenced sources such as topographic maps and geologic, soils and hydrologic reports.
- Usage of the property, adjoining properties and surrounding area through a review of referenced historical sources such as land title records, fire insurance maps, city directories, aerial photographs, prior reports and interviews.
- Observations and interviews regarding current property usage and conditions including: the use, treatment, storage, disposal or generation of hazardous substances, petroleum products, hazardous wastes, nonhazardous solid wastes and wastewater.
- Usage of adjoining and surrounding area properties and the likely impact of known or suspected releases of hazardous substances or petroleum products from those properties in, on or at the property.
- Information in referenced environmental agency databases and local environmental records, within the specified approximate minimum search distance from the property.
- Potential for subsurface vapor migration in, on or at the property as described in Section 7.0.

The scope of the assessment also included consideration of the following potential environmental issues or conditions that are beyond the scope of ASTM Standard Practice E1527-13:

- The scope of work for the Mold Screening was intended to be consistent with ASTM E 2418-06: Standard Guide for Readily Observable Mold and Conditions Conducive to Mold in Commercial Buildings: Baseline Survey Process. The scope of work, including potential deviations from the Standard Guide, is described as follows. The interview was limited to at least one knowledgeable person from property management or engineering staff. The document review was limited to only those relevant documents made readily available to ATC in a timely manner. The physical observations were limited to certain Heating, Ventilation and Air Conditioning (HVAC) system areas and other readily accessible building areas likely to become subject to water damage, plumbing leaks, and flooding. Unless noted otherwise herein, ATC observed the HVAC equipment room(s) and accessible mechanical rooms and, in buildings with package units in the ceiling, at least one unit per floor. Also, unless noted otherwise, ATC observed accessible areas of the basement (or lowest level), the top floor, the roof (including any penthouse areas) and at least one mid-level floor (if applicable). For multi-story buildings, the total number of floors observed (inclusive of those

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Bishop Ranch
2600 Camino Ramon
San Ramon, California 94583

already mentioned) was intended to be up to 10% of the total number of floors (if readily accessible). For hotel and multi-family buildings, ATC targeted the lowest and highest levels and roof as described above and up to 10% of units, including one per floor if readily accessible. The Mold Screening did not include destructive methods of observation. No sampling or laboratory analyses were conducted. The Mold Screening service as described herein was limited in scope and by the time and cost considerations typically associated with performing a Phase I ESA. No method can guarantee that a hazard will be discovered if evidence of the hazard is not encountered within the performance of the Mold Screening as authorized and that opinions and conclusions must, out of necessity, be extrapolated from limited information and discrete, non-continuous data points. Unidentified mold or other microbial conditions may exist on the property.

- Visual observation of suspect asbestos-containing materials (ACM), consisting of providing an opinion on the condition of suspect ACM on the property based upon visual observation during the site reconnaissance. No sampling of suspect ACM was conducted.
- Radon document review, consisting of the review of published radon data with regard to the potential for elevated levels of radon gas in the surrounding area of the property. No radon sampling was conducted.
- Lead in Drinking Water Data review, consisting of contacting the water supplier for information regarding whether or not the potable water provided to the property meets the drinking water standards for lead.
- Visual observation of Lead-based paint (LBP), consisting of providing an opinion on the potential for suspect LBP based on the construction date of buildings on the property and visual observation of the condition of suspect LBP.
- Wetlands document review, consisting of a review of a current National Wetlands Inventory map of the surrounding area to note if the property is identified as having a wetland.
- Flood plain document review, consisting of a review of a reasonably ascertainable flood plain map of the surrounding area to note if the property is identified as being located within a flood plain.
- Regulatory Agency File and Records Review, consisting of conducting a file review (i.e., via Freedom of Information Act (FOIA) request or alternative method/source) for the property and/or one adjoining property at one regulatory agency, as warranted by the findings of the ESA.

2.3 Significant Assumption

The assumptions in this report were not considered as having significant impact on the determination of *recognized environmental conditions* associated with the property.

2.4 Limitations and Exceptions

ATC has prepared this Phase I ESA report using reasonable efforts to identify *recognized environmental conditions* associated with hazardous substances or petroleum products in, on or at the property. Findings contained within this report are based on information collected from observations made on the day(s) of the site reconnaissance and from reasonably ascertainable information obtained from certain public agencies and other referenced sources.

The ASTM Standard Practice E1527-13 recognizes inherent limitations for Phase I ESAs, including, but not limited to:

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Bishop Ranch
2600 Camino Ramon
San Ramon, California 94583

- *Uncertainty Not Eliminated* – A Phase I ESA cannot completely eliminate uncertainty regarding the potential for *recognized environmental conditions* in connection with any property.
- *Not Exhaustive* – A Phase I ESA is not an exhaustive investigation of the property and environmental conditions on such property.
- *Past Uses of the Property* – Phase I requirements only require review of standard historical sources at five year intervals. Therefore, past uses of property at less than five year intervals may not be discovered.

Users of this report may refer to ASTM Standard Practice E1527-13 for further information regarding these and other limitations. This report is not definitive and should not be assumed to be a complete and/or specific definition of all conditions above or below grade. Current subsurface conditions may differ from the conditions determined by surface observations, interviews and reviews of historical sources. The most reliable method of evaluating subsurface conditions is through intrusive techniques, which are beyond the scope of this report. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other property construction purposes. Any use of this report by any party, beyond the scope and intent of the original parties, shall be at the sole risk and expense of such user.

ATC makes no representation or warranty that the past or current operations at the property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes. This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated. Regardless of the findings stated in this report, ATC is not responsible for consequences or conditions arising from facts not fully disclosed to ATC during the assessment.

An independent data research company provided the government agency database referenced in this report. Information on surrounding area properties was requested for approximate minimum search distances and is assumed to be correct and complete unless obviously contradicted by ATC's observations or other credible referenced sources reviewed during the assessment. ATC shall not be liable for any such database firm's failure to make relevant files or documents properly available, to properly index files, or otherwise to fail to maintain or produce accurate or complete records.

ATC makes no warranty, guarantee or certification regarding the quality, accuracy or reliability of any prior report provided to ATC and discussed in this Phase I ESA report. ATC expressly disclaims any and all liability for any errors or omissions contained in any prior reports provided to ATC and discussed in this Phase I ESA report.

ATC used reasonable efforts to identify evidence of aboveground and underground storage tanks and ancillary equipment on the property during the assessment. "Reasonable efforts" were limited to observation of accessible areas, review of referenced public records and interviews. These reasonable efforts may not identify subsurface equipment or evidence hidden from view by things including, but not limited to, snow cover, paving, construction activities, stored materials and landscaping.

Any estimates of costs or quantities in this report are approximations for commercial real estate transaction due diligence purposes and are based on the findings, opinions and conclusions of this assessment, which are limited by the scope of the assessment, schedule demands, cost constraints, accessibility limitations and other factors associated with performing the Phase I ESA. Subsequent determinations of costs or quantities may vary from the estimates in this report. The estimated costs or quantities in this report are not intended to be used for financial disclosure related to the Financial Accounting Standards Board (FASB) Statement No. 143, FASB Interpretation No. 47, Sarbanes/Oxley Act or any United States Securities and Exchange Commission reporting obligations, and may not be used for such purposes in any form without the express written permission of ATC.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Bishop Ranch
2600 Camino Ramon
San Ramon, California 94583

ATC is not a professional title insurance or land surveyor firm and makes no guarantee, express or implied, that any land title records acquired or reviewed in this report, or any physical descriptions or depictions of the property in this report, represent a comprehensive definition or precise delineation of property ownership or boundaries.

The Environmental Professional Statement in Section 1.1 of this report does not “certify” the findings contained in this report and is not a legal opinion of such *Environmental Professional*. The statement is intended to document ATC’s opinion that an individual meeting the qualifications of an Environmental Professional was involved in the performance of the assessment and that the activities performed by, or under the supervision of, the *Environmental Professional* were performed in conformance with the standards and practices set forth in 40 CFR Part 312 per the methodology in ASTM Standard Practice E1527-13 and the scope of work for this assessment.

Per ASTM Standard Practice E1527-13, Section 6, User Responsibilities, the User of this assessment has specific obligations for performing tasks during this assessment that will help identify the possibility of *recognized environmental conditions* in connection with the property. Failure by the User to fully comply with the requirements may impact their ability to use this report to help qualify for *Landowner Liability Protections* (LLPs) under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). ATC makes no representations or warranties regarding a User’s qualification for protection under any federal, state or local laws, rules or regulations.

In accordance with the ASTM Standard Practice E1527-13, this report is presumed to be valid for a six month period. If the report is older than six months, the following information must be updated in order for the report to be valid: (1) regulatory review, (2) site visit, (3) interviews, (4) specialized knowledge and (5) environmental liens search. Reports older than one year may not meet the ASTM Standard Practice E1527-13 and therefore, the entire report must be updated to reflect current conditions and property-specific information.

Other limitations and exceptions that are specific to the scope of this report may be found in corresponding sections.

2.5 Special Terms and Conditions (User Reliance)

This report is for the use and benefit of, and may be relied upon by 2600 CR LLC, Sunset Development Company and Pacific Life Insurance Company, in connection with a commercial real estate transaction involving the property. If the report or a letter of reliance is to be addressed to a third party other than 2600 CR LLC, Sunset Development Company or Pacific Life Insurance Company, that party must be identified by 2600 CR LLC, Sunset Development Company or Pacific Life Insurance Company prior to report issuance and accept the terms and limitations in the report and/or Letter of Reliance, unless an alternative written agreement is executed between ATC and the third party.

3.0 SITE DESCRIPTION

3.1 Location and Legal Description

The property is an approximately 108-acre irregular-shaped single parcel of land located at 2600 Camino Ramon in the City of San Ramon. The property is located at the northwestern corner of Bishop Drive and Camino Ramon in a commercial and retail area of San Ramon. The property is improved with a four-story commercial building and associated parking garage. The 2,052,496 square-foot building is comprised of four wings; North Wing, South Wing, East Wing and West Wing. The parking garage is 357,118 square feet and was constructed in 2016. Asphalt-paved parking lots are located on the northwestern, northeastern, and southeastern corners of the property and the garage is located on the south end of the property. There are two lakes on the property referred to as East Lake and West Lake. According to the information obtained from the Contra Costa County Property Assessor office. The property is identified as Assessor's Parcel Number (APN) 213-133-047.

The Site Vicinity Map is located in Appendix A. The Site Plan is located in Appendix B. Site photographs are provided in Appendix C.

3.2 Surrounding Area General Characteristics

The property is located in an area that is primarily characterized by commercial and retail properties. Surface topography across the property and in the surrounding area is relatively flat and slopes slightly to the east-southeast. The specific adjacent property uses are discussed in Section 3.5.

3.3 Current Use of the Property

The property is an approximately 108 acre irregular-shaped single parcel of land located at 2600 Camino Ramon in the City of San Ramon. The property is improved with an approximately 2,052,496 square foot building is comprised of four wings which contain office space, several meeting rooms, break rooms, computer labs, an auditorium, a basement, and a large cafeteria. Asphalt-paved parking lots are present on the northwestern, northeastern, and southeastern corners of the property. A three-story parking garage is located in the southeast portion of the property. There are two lakes on the property referred to as East Lake and West Lake, which are extensively landscaped with grass, shrubs, and trees.

3.4 Description of Property Improvements

The following table provides general descriptions of the property improvements.

| PROPERTY IMPROVEMENTS | |
|---|--|
| Size of Property (approximate) | 108 acres |
| General Topography of Property | Slopes slightly to the east-southeast |
| Adjoining and/or Access/Egress Roads | Camino Ramon to the east, Executive Parkway to the north, and Bishop Drive to the west and south |
| Paved or Concrete Areas (including parking) | Asphalt-paved parking lots along the northern and southern portions of the property; and concrete sidewalks around the building perimeter and adjoining streets. |
| Unimproved Areas | None |
| Landscaped Areas | The property consists of two lakes which are extensively landscaped with grasses, trees and shrubs. |
| Surface Water | The property consists of two lakes; East and West Lake |
| Potable Water Source | East Bay Municipal Utility District (EBMUD) |
| Sanitary Sewer Utility | Contra Costa County |
| Storm Sewer Utility | Contra Costa County |
| Electrical Utility | Pacific Gas and Electric (PG&E) |
| Natural Gas Utility | PG&E |
| Current Occupancy Status | 80% |
| Unoccupied Buildings/Spaces/Structures | None |
| Number of Occupied Buildings | Two |

| | |
|---|--|
| Building Name or General Building Description | Commercial office building |
| Number of Floors | Four |
| Total Square Feet of Space (approximate) | 2,052,496 square feet |
| Construction Completion Date (year) | 1984 |
| Construction Type | Steel-framed structure with subgrade basement areas supported on deep pile foundation. |
| Interior Finishes Description | Concrete, steel and glass |
| Exterior Finishes Description | Carpeting, wood floors, ceramic tile, vinyl flooring, acoustical ceiling tiles and drywall. |
| Cooling System Type | Variable Air Volume (VAV) system-conditioned air is provided by one or two built-up air handling units per wing. |
| Heating System Type | VAV system-hot water reheat and/or baseboard heating per wing. |
| Emergency Power | Seven emergency generators are located within the basement of the property building. |

| | |
|---|---------------------|
| Building Name or General Building Description | Parking Garage |
| Number of Floors | Four |
| Total Square Feet of Space (approximate) | 357,118 square feet |
| Construction Completion Date (year) | 2016 |
| Construction Type | Reinforced concrete |
| Interior Finishes Description | Concrete and steel |
| Exterior Finishes Description | Painted steel |
| Cooling System Type | None |
| Heating System Type | None |

3.5 Current Uses of Adjoining Properties

Current uses of the adjoining properties were observed to be as follows:

| Direction from Property | Address | Occupant(s) Name | Current Use | Potential Environmental Conditions |
|-------------------------|--|---|----------------------------|--|
| Northwest | 3000-5000 Executive Parkway and 2440 Camino Ramon | Executive Parkway followed by Bishop Ranch Office Park | Commercial | None |
| North | 2527 Camino Ramon | Executive Parkway followed by Bishop Ranch 7 | Commercial | None |
| Northeast | 2603-2633 Camino Ramon | Camino Ramon followed by Bishop Ranch 3 Office Park | Commercial | Refer to Section 5.1 for database listings |
| Southeast | 2610-2694 Camino Ramon, 150 Sunset Drive, and 6000 Bollinger Canyon Road | Bishop Drive followed by the Bishop Ranch Shopping Center and the San Ramon City Center | Commercial | Refer to Section 5.1 for database listings |
| Southwest | 2600 Bishop Drive and Interstate 680 followed by Residential Homes | Bishop Drive followed by the Marriot Hotel and Interstate 680 | Commercial/ Residential | Refer to Section 5.1 for database listings |

4.0 USER PROVIDED INFORMATION

The following section summarizes information (if any) provided by Sunset Development Company (User) with regard to the Phase I ESA. Documentation may be found in Appendix D or where referenced in this report.

4.1 Title Records

The User provided no title records information.

4.2 Environmental Liens or Activity and Use Limitations (AULs)

User provided no information regarding property environmental liens. ATC contracted with Environmental Data Resources, Inc. (EDR) to conduct a search for information regarding property environmental liens or activity and use limitations (AULs). No existing environmental liens or AULs were identified in connection with the property. A copy of the lien search report is provided in Appendix L.

4.3 Specialized Knowledge or Experience of the User

The User provided no specialized knowledge regarding *recognized environmental conditions* associated with the property.

4.4 Significant Valuation Reduction for Environmental Issues

The User provided no information regarding a significant valuation reduction for environmental issues associated with the property.

4.5 Owner, Property Manager and Occupant Information

The User identified the property contact as Mr. Jeff Finazzo, Director of Facilities with Sunset Development Company.

4.6 Reason for Performing Phase I ESA

According to information provided by the User, this Phase I ESA will be used in connection with a commercial real estate transaction to identify *recognized environmental conditions* associated with the property.

4.7 Other User Provided Documents

The User provided access to the prior Phase I ESA performed at the property by ATC. A discussion of these prior reports can be found in Section 5.3.1.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Bishop Ranch
2600 Camino Ramon
San Ramon, California 94583

5.0 RECORDS REVIEW

5.1 Standard Environmental Records

The regulatory agency database report discussed in this section, provided by EDR of Shelton, Connecticut, was reviewed for information regarding reported use or release of hazardous substances and petroleum products on or near the property. Unless otherwise noted, the information provided by the regulatory agency database report and other sources referenced in this report, were considered sufficient for *recognized environmental condition (REC)*, *controlled recognized environmental condition (CREC)*, *historical recognized environmental condition (HREC)* or *de minimis condition* determinations without conducting supplemental agency file reviews. ATC also reviewed the "unmappable" (also referred to as "orphan") listings within the database report, cross-referencing available address information and facility names. Unmappable sites are listings that could not be plotted with confidence, but are potentially in the general area of the property, based on the partial street address, city, or zip code. Any unmappable site that was identified by ATC as being within the approximate minimum search distance from the property, based on the site reconnaissance and/or cross-referencing to mapped listings, is included in the discussion within this section. The complete regulatory agency database report may be found in Appendix E.

The following is a summary of the findings of the database review.

| SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS | | | |
|---|---------------------------------|------------------|----------------|
| Regulatory Database | Approx. Minimum Search Distance | Property Listed? | # Sites Listed |
| Federal National Priority List (NPL) | 1 mile | No | 0 |
| Federal Delisted NPL | ½ mile | No | 0 |
| Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) list | ½ mile | No | 0 |
| Federal CERCLIS No Further Remedial Action Planned (NFRAP) | ½ mile | No | 0 |
| Federal Resource Conservation and Recovery Act (RCRA), Corrective Action facilities (CORRACTS) | 1 mile | No | 1 |
| Federal RCRIS non- CORRACTS Treatment, Storage, and Disposal Facilities (TSD) | ½ mile | No | 0 |
| Federal RCRA Generators | Property & Adjoining | Yes | 5 |
| Federal Institutional Control/Engineering Control Registry | Property | No | 0 |

5.1.1 Federal Agency Database Findings

The property was identified within several federal, state and local agency databases. All database listings for the property are discussed below:

Pacific Bell/ SBC Regional Utility Vaults/ AT&T California
2600 Camino Ramon

Databases: RCRA-SQG, ERNS, FINDS, NPDES, EMI, UST, AST, HIST UST, SWEEPS UST, CHMIRS, CONTRA COSTA CO. SITE, HAZNET

Approximate Distance from the Property: N/A - Target Property

Assumed Groundwater Gradient: N/A - Target Property

Regulatory Data Summary: The property is listed within the Federal RCRA-SQG database as a small-quantity hazardous waste generator with no RCRA violations reported. The Federal FINDS database listing for the property indicates that the property is tracked under the RCRA program. The ERNS listing for the property is related to a hazardous materials incident which occurred in 2001. According to the listing, the local fire department responded to fumes reported by onsite workers. The fumes were from a dry cell battery leak. No soil and/or groundwater impacts occurred due to this release. The property is listed as having an active state NPDES permit associated with the discharge of groundwater from dewatering sumps located throughout the property. Additionally the property is listed within the state EMI database as a hazardous air emissions facility between the years 2002 and 2015. The HAZNET database listings reported for the property are related to hazardous waste manifests. These hazardous wastes include liquids with halogenated organic compounds greater than 1,000 milligrams per liter; waste oil/mixed oil; other inorganic solid wastes; other organic solids; off-specification, aged, surplus wastes; aqueous solutions with total organic residues less than ten percent; and unspecified oil-containing wastes. The HIST UST and SWEEPS UST listings are related to the operation of two USTs: one 10,000-gallon diesel UST and one 12,000-gallon unleaded gasoline UST. These USTs were reportedly installed in 1985 and had electronic leak sensors in place for leak detection monitoring. In 2001, the 12,000-gallon gasoline UST was removed from the property. The gasoline UST was used for fueling fleet vehicles operated by Pacific Bell. No soil or groundwater impacts are reported. The UST was closed under the oversight of the Contra Costa County Environmental Health Department with no further assessment required. The current UST listing for the property is related to two active USTs: a 10,000-gallon diesel fuel UST located within the southeastern-most parking lot (installed 1985), and a 2,000-gallon diesel fuel UST located within the northwestern-most parking lot (installed 1996). The property is listed as an active AST site due to the onsite operation of ASTs containing diesel fuel. The CONTRA COSTA CO. SITE listing is related to the onsite operation of ASTs and USTs on the property.

The property is listed within the CHMIRS database for three hazardous material incidents. In 2001 employees complaining of light-headedness from gasoline fumes emitted during a UST removal taking place at the property. The UST was closed under the oversight of the Contra Costa County Environmental Health Department with no further assessment required. The second incident occurred in 2008 when 15 gallons of hydraulic oil was released from a trash compactor located in the property basement. The hydraulic oil release occurred on concrete and was cleaned up using absorbent. No soil and/or groundwater impacts occurred due to this release. In 2012, during the

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Bishop Ranch
2600 Camino Ramon
San Ramon, California 94583

testing of an onsite generator, the day storage tank overflowed in to the containment area. A licensed contractor responded to the incident. During the cleanup it was discovered that some of the diesel fuel spilled into an onsite sump. The sump was pumped out. The spill was reportedly contained on the facility. No impacts to soil and/or groundwater were reported.

Discussion: Based on the regulatory closure status of the former 12,000-gallon UST (removed in 2001), this listing is considered to be a *historical recognized environmental condition* which requires no further assessment at this time. Based on the lack of reported impacts to soils and/or groundwater, the hazardous material incidents reported within the CHMIRS database are considered to be *de minimis* conditions which require no further assessment at this time. ATC concludes that the remaining listings do not represent a *recognized environmental condition* to the property at this time.

The following listing(s) with a known or significant potential for release and impact on the property were identified in the federal agency databases searched:

Target Store #0949

2610 Bishop Drive

Databases: RCRA-LQG

Approximate Distance from the Property: Adjacent to the south-southwest beyond Bishop Drive

Assumed Groundwater Gradient: Down-gradient

Regulatory Data Summary: The site is listed within the Federal RCRA-LQG database as a large-quantity hazardous waste generator with no RCRA violations reported.

Discussion: Based upon the site's regulatory status, ATC concludes that this listing does not represent a likely past, present or material threat of release on the property.

San Ramon Valley Recycled Water Pipelines

2603 Bishop Drive

Databases: NPDES, Contra Costa Co. Site List

Approximate Distance from the Property: Adjacent to the east beyond Camino Ramon

Assumed Groundwater Gradient: Down-gradient

Regulatory Data Summary: The site is listed as having an active state NPDES permit associated with discharging wastewater. The Contra Costa Co. Site Listing is currently inactive.

Discussion: Based upon the site's regulatory status, ATC concludes that this listing does not represent a likely past, present or material threat of release on the property.

San Ramon Marriott / T-Mobile West Corp

2600 Bishop Drive

Databases: RCRA NonGen / NLR

Approximate Distance from the Property: Adjacent to the southwest beyond Bishop Drive

Assumed Groundwater Gradient: Down-gradient

Regulatory Data Summary: The site is listed within the Federal RCRA-NonGen / NLR database for no longer generating hazardous waste. The aboveground storage tank (AST) and UST listings associated with an onsite emergency generator. The Contra Costa Co. Site Listing is currently inactive.

Discussion: Based upon the site's regulatory status, ATC concludes that this listing does not represent a likely past, present or material threat of release on the property.

Due to the dense commercial nature of the surrounding properties, numerous sites were identified during the federal database search. ATC did not identify sites with evidence of active cleanup underway or historic releases and/or spills that would be of concern to the property. Based on distance, topography, assumed groundwater gradient, current regulatory status, and/or the absence of reported releases, none of the sites listed in the federal databases are considered to represent a likely past, present or material threat of release

in, on, or at the property. Given the physical setting characteristics of the property and surrounding area, supplemental agency file reviews were not warranted to verify the database report information.

5.1.2 State and Tribal Database Findings

Due to the dense commercial nature of the surrounding properties, numerous sites were identified during the state and tribal database search. ATC did not identify sites with evidence of active cleanup underway or historic releases and/or spills that would be of concern to the property. Based on distance, topography, assumed groundwater gradient, current regulatory status, and/or the absence of reported releases, none of the sites listed in the state and tribal databases are considered to represent a likely past, present or material threat of release in, on, or at the property. Given the physical setting characteristics of the property and surrounding area, supplemental agency file reviews were not warranted to verify the database report information.

5.1.3 Local Environmental Records Sources

Contra Costa County Environmental Health Department

ATC submitted a written request to Contra Costa County Environmental Health Department for records pertaining to the property. At the time this report was prepared, the department has not provided a response to ATC's request.

Local Environmental Agency

ATC contacted the RWQCB, San Francisco Regional Office and requested available files for the property. The RWQCB has not provided a response to ATC's request as of the date of this report. If information becomes available to ATC that alters the conclusions and/or recommendations presented herein, an addendum will be submitted.

According to the RWQCB GeoTracker website, <http://geotracker.swrcb.ca.gov> (GeoTracker), the property is a permitted UST facility. There are no LUST sites or SLIC sites reported on the property.

California Department of Toxic Substances Control (DTSC)

ATC contacted the DTSC, Berkeley Office and requested available files for the property. ATC reviewed files on July 17, 2019 and include hazardous waste manifests from 1993 to 1996.

According to the DTSC Envirostor website, <https://www.envirostor.dtsc.ca.gov> (Envirostor), the property is not listed.

San Ramon Valley Fire District (SRVFD)

ATC requested a search of available records pertaining storage tanks, hazardous materials or incident of fire files for the property. Ms. Sue Brooks of the SRVFD responded on July 2, 2019 with a Compliance Inspection Report from 2018 and 2019. Documentation is included in Appendix J.

City of San Ramon Department of Planning and Zoning

ATC contacted the Contra Costa County Planning Department and confirmed the property is zoned Administrative Office Height Overlay (OAH).

Electrical Utility Company

ATC confirmed that PG&E provides electricity to the property.

Water Utility

The drinking water utility provider for the property and surrounding area is the EBMUD. According to the 2018 EBMUD Annual Water Quality Report, the municipally supplied water meets or exceeds all drinking water standards, including those for lead. A copy of the water quality report is included in Appendix L.

Sewer Utility

ATC confirmed with the Contra Costa Sanitation District that they provide sanitary sewer utility to the property.

Other Local Environmental Records Sources

No additional local environmental records sources were reviewed.

5.2 Physical Setting Sources

5.2.1 Topography

A United States Geological Survey (USGS) 7.5-Minute Series Topographic Map showing the area where the property is located was obtained and reviewed. Specifically, the 2012 USGS Diablo, California quadrangle map was reviewed. According to the topographic map, the property is located approximately 462 feet above mean sea level. The map indicates the area slopes slightly with a general gradient to the east-southeast.

A copy of the topographic map is included in Appendix L.

5.2.2 Geology

ATC reviewed the Geological Map of the Diablo quadrangle, Contra Costa and Alameda Counties, California Map Dated 2005. The property is located in an area characterized by surficial sediments from the Holocene Era. The sediments are composed of alluvial pebble gravel, sand and clay of valley areas.

5.2.3 Soils

According to soils data compiled by EDR from digitized United States Department of Agriculture (USDA) maps and resources, the property is underlain by soil component name, Clear Lake (61%) and Botella Loam (38%). This soil is clayey with a high water table and is considered poorly drained.

A copy of the topographic map is included in Appendix L.

5.2.4 Hydrology

According to information for a nearby site on GeoTracker, namely 2350 San Ramon Valley Boulevard which is located approximately 4,300 feet to the northwest of the property, groundwater was reported at a depth of 11 to 14 feet. Considering the surface topography for the property area, as interpreted from the Diablo California Quadrangle map, local groundwater would be expected to flow towards the east-southeast. Therefore, in assessing potential off-site environmental impacts, facilities located to the west and northwest of the property are of primary concern.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Bishop Ranch
2600 Camino Ramon
San Ramon, California 94583

However, actual groundwater flow direction is often locally influenced by factors such as underground structures, seasonal fluctuations, soil and bedrock geology, production wells, and other factors beyond the scope of this study. The actual groundwater flow direction under the property can be accurately determined only by installing groundwater-monitoring wells, which was beyond the scope of this project.

5.2.5 Other Physical Setting Sources

Flood Plain Map

According to the Federal Emergency Management Agency (FEMA) website, <http://www.fema.gov>, the Flood Insurance Rate Map of the area (FIRM Map No. 06013C0464F, dated June 16, 2009) indicates that the property is within Zone X, an area determined to be outside the 0.2 percent annual chance floodplain.

Wetlands Map

According to the United States Fish and Wildlife wetlands mapper website, <http://fws.nwi.gov>, the west lake is designated as a freshwater pond. Based on the fact that the property is already developed, this designation is not considered to represent an environmental concern to the property. However, if there are future plans which may alter the lake, a wetland review may be required by the United States Fish and Wildlife.

A copy of the National Wetlands Inventory map is included in Appendix L.

5.3 Historical Records Sources

The following table summarizes the findings of the research presented below pertaining to historical property and surrounding area uses.

| HISTORICAL USE SUMMARY | | | | |
|------------------------|----------------------------|-----------------------------------|---|---|
| Period | Identified Historical Uses | | Source(s) | Intervals/Comments |
| | Property | Surrounding Area | | |
| Prior to 1940 | Agriculture | Agriculture | Topographic Maps, Aerial Photographs | Data gaps exist, however no use change across gaps. |
| 1940 - 1960 | Agriculture | Agriculture | Topographic Maps, Aerial Photographs | Data gaps exist, however no use change across gaps. |
| 1961 - 1980 | Agriculture | Agriculture | Topographic Maps, Aerial Photographs | Data gaps exist, however no use change across gaps. |
| 1981 - 2000 | Agriculture | Agriculture | Aerial Photographs City Directories Building Permits | Data gaps exist, however no use change across gaps. |
| 2001 - present | Agriculture/Commercial | Agriculture/Commercial/ Retail | Topographic Maps Aerial Photographs Building Permits City Directories Environmental Records | No data gaps. |

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Bishop Ranch
2600 Camino Ramon
San Ramon, California 94583

The earliest record of the property is an 1896 topographic map, which depicts the property undeveloped land. A 1939 aerial photograph depicts the property as agricultural land until it was cleared in circa 1982 in preparation for the development of the current property improvements. The review of historical records indicated that the property was historically utilized for agricultural purposes. Based on the historical agricultural use of the property, pesticides and/or herbicides may have been utilized on the property and near-surface soils may have at one time contained these compounds. However, it has been ATC's experience that during site grading, near-surface soils are reworked. Therefore, the historical agricultural use of the property is not considered to represent an environmental concern.

ASTM Standard E 1527-05 requires review of historical use resources at approximately five-year intervals. Since gaps in data occur at greater than five-year intervals, data failure occurs relative to the standard requirements. However, because multiple sources indicate the same prior uses of the property, ATC does not consider the data gaps to be significant.

5.3.1 Aerial Photographs

ATC reviewed available aerial photographs of the property and surrounding area at EDR. Available aerial photographs ranged from 1939 to 2016. The purpose of the review was to identify visible evidence of the use of the property or immediate vicinity that may pose potential environmental concern. The following are descriptions and interpretations from the aerial photograph review. Copies of reproducible aerial photographs are included in Appendix F.

| AERIAL PHOTOGRAPH SUMMARY | | |
|--|-------------------|---|
| Year | Scale | Comments |
| 1939, 1946, 1949, 1950, 1959, 1963, 1966, 1979 | 1 inch = 500 feet | Property: The property is utilized for agricultural purposes. Surrounding Area: The surrounding areas are utilized for agricultural purposes. |
| 1982 | 1 inch = 500 feet | Property: The property has been cleared of agricultural crops and appears to have been graded and leveled in preparation for development. Access roads to the property are depicted. Surrounding Area: The surrounding areas to the north, south and east of the property have been cleared of agricultural crops and appear to have been graded and leveled in preparation for development. Interstate-680 is depicted to the west of the property. |
| 1993 | 1 inch = 500 feet | Property: The property is depicted in the current configuration. Surrounding Area: The surrounding areas to the northeast and northwest are developed for commercial use. Interstate 680 is depicted to the west of the property. The surrounding area to the east of the property (beyond Camino Ramon) is depicted as vacant land. The surrounding area to the south of the property (beyond Bishop Drive) is a mix of commercial development and vacant land. |
| 1998 | 1 inch = 500 feet | Property: The property is depicted in the current configuration. Surrounding Area: The surrounding areas to the north are developed for commercial use. Interstate-680 is depicted to the west of the property. The surrounding area to the east of the property (beyond Camino Ramon) has been graded and leveled in preparation for development. The surrounding area to the south of the property (beyond Bishop Drive) is a mix of commercial development and vacant land. |
| 2005, 2006, 2009, 2010, 2012, 2016 | 1 inch = 500 feet | Property: The property is depicted in the current configuration. Surrounding Area: The surrounding area is depicted in the current configuration. |

The review of aerial photographs indicated that the property was historically utilized for agricultural purposes. Based on the historical agricultural use of the property, pesticides and/or herbicides may have

been utilized on the property and near-surface soils may have at one time contained these compounds. However, it has been ATC's experience that during site grading, near-surface soils are reworked. Therefore, the historical agricultural use of the property is not considered to represent an environmental concern.

Copies of reproducible aerial photographs are included in Appendix F.

5.3.2 Fire Insurance Maps

A search for fire insurance maps for the property and surrounding area was conducted by EDR. No such maps for the property were available.

5.3.3 Property Tax Files

ATC reviewed reasonably ascertainable tax files at Nationwide Environmental Title Research (NETR) online for historical ownership information pertaining to the property. Pacific Bell Telephone Co. is listed as the owner. Documentation is included in Appendix G.

The review of tax files did identify past uses indicating *recognized environmental conditions* in, on, or at the property and surrounding area.

5.3.4 Recorded Land Title Records

The acquisition of recorded land title records was not required by the scope of work for the Phase I ESA.

5.3.5 Historical USGS Topographic Maps

ATC reviewed available historical topographic maps of the property and surrounding areas provided by EDR. Available topographic maps ranged from 1896 to 2012. The topographic maps reviewed depicted the property and surrounding area as undeveloped land from 1896 until circa 1947. The 1953, 1968, 1973 and 1980 topographic maps depict the property and surrounding areas as agricultural land. The 1980 and 2012 topographic maps depict the property as urban development.

The review of topographic maps indicated that the property was historically utilized for agricultural purposes. Based on the historical agricultural use of the property, pesticides and/or herbicides may have been utilized on the property and near-surface soils may have at one time contained these compounds. However, it has been ATC's experience that during site grading, near-surface soils are reworked. Therefore, the historical agricultural use of the property is not considered to represent an environmental concern.

5.3.6 City Directories

Research regarding the availability of historical city directories was obtained from EDR. The following are descriptions and interpretations from the historical city directory review. Documentation is included in Appendix G.

| CITY DIRECTORY SUMMARY | |
|------------------------|--|
| Year | Comments |
| 1987 | Property: Ara Services Inc, Pacific Bell Surrounding Area: Various commercial office tenants. |
| 1992 | Property: Ara Services Inc, Bill Lock/Pacific Bell, Pacific Bell, Patelco Credit Union Surrounding Area: Various commercial office tenants. |
| 1995 | Property: Aramark, EBTEL Federal Credit Union, Patelco Credit Union Surrounding Area: Various commercial office tenants. |

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Bishop Ranch
2600 Camino Ramon
San Ramon, California 94583

| CITY DIRECTORY SUMMARY | |
|------------------------|--|
| Year | Comments |
| 2000 | Property: Pacific Bell, ACME Building Maintenance Co, Alert Staffing LLC, Aramark Services Inc, EBTEL Federal Credit Union Surrounding Area: Various commercial office tenants. |
| 2005 | Property: 145 Studios, ACME Building Maintenance Co, Corporate Real Estate Team, Darlyna Swartz, Pacbell Wing Kong, FPC Services, Southwestern Bell Telephone LPC Surrounding Area: Various commercial office tenants. |
| 2010 | Property: 145 Studios, Acme Building Maintenance Co Inc, Alert Staffing Llc, Ameritech, Aramark Sbc 1169, At & T, At & T Services Inc, E B T E L Federal Credit Union, Pacbell Wing Kong, Patelco Credit Union, Sbc Communications, Sbc Datacomm Inc Surrounding Area: Various commercial office tenants. |
| 2014 | Property: Acme Building Maintenance Co, Att California, CA William Att, Jolieco, Premier Office Group, Reed Michael J Attorney At Law, S & D Systems, Sbc Laboratories Surrounding Area: Various commercial office tenants. |

The review of city directories did not identify past uses indicating *recognized environmental conditions* in, on, or at the property or surrounding areas.

5.3.7 Building Department Records

ATC reviewed building permit records for the property provided by EDR. The permits were dated between 1990 and 2016 for various tenant improvements, alterations and/or repairs. There were no notable permits indicating potential *recognized environmental conditions* at the property.

Documentation is included in Appendix G.

5.3.8 Zoning/Land Use Records

ATC reviewed available historical zoning/land use records at NETR for information regarding past uses of the property and surrounding area. The property is currently zoned as "Office Building". Documentation is included in Appendix G.

5.3.9 Prior Reports

The following provides a summary of information from prior reports made available to ATC for review. Documentation is included in Appendix H. Proposals and field forms associated with the reports below are not summarized but are included in Appendix H.

Daily Field Reports, SCA Environmental, Inc. October 2015

The information documents the cleaning of the fan rooms and plenum rooms due to dark or black material found on the fans. The daily field reports note that the site passed the semi-aggressive air testing and can be released for re-occupancy.

Bulk Asbestos Analysis, Micro Analytical Laboratories, June 30, 2016

The document provides information on the results of asbestos containing material (ACM) testing of several materials in the building. The results indicated 5% asbestos in samples of the black floor tile mastic.

Lead Analysis, Micro Analytical Laboratories, June 30, 2016

The report notes the collection and analysis of lead samples taken from the building resulting in the following:

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Bishop Ranch
2600 Camino Ramon
San Ramon, California 94583

- 7.5 mg/Kg lead in the floor tile (gray), drywall, and 3 x 3 ceramic floor tile.
- <6.3 mg/Kg lead in the floor tile (gray), drywall, and 3 x 3 ceramic floor tile.
- 22 mg/Kg lead in the floor tile (gray), drywall, and 3 x 3 ceramic floor tile.
- 4,200 mg/Kg lead in the wall tile (white), drywall, and 5 x 5 ceramic wall tile.
- 6,400 mg/Kg lead in the wall tile, drywall, and 5 x 5 ceramic wall tile.

Lead-In-Construction Compliance Plan, Stomper Company, July 1, 2016

The Lead-In-Construction Compliance Plan (Plan) was developed to comply with Federal and California Construction Lead Standards. The Plan provided general control and work practices, personal protective equipment, and exposure monitoring for lead construction materials.

Asbestos Clearance Air Sampling (PCM analysis), Patriot Environmental Laboratory Services, Inc., September 23, 2016

In August and September of 2016, Patriot Environmental Laboratory Services, Inc. performed clearance air sampling. One hundred and thirty-two (132) air samples were collected from inside the contained work areas in an attempt to determine if airborne fiber concentrations fell below the EPA recommended clearance criteria of 0.01 fiber per cubic centimeter of air. On September 16, 2016, Patriot collected final PCM clearance samples and performed a final visual clearance inspection throughout the East Wing to determine the completion of flooring mastic removal at Bishop Ranch. No visual evidence of remaining or residual flooring mastic was observed. All PCM clearance results indicate that the asbestos fiber levels were below the EPA recommended clearance criteria of 0.01 fibers per cubic centimeter of air.

Phase I Environmental Site Assessment, ATC Group Services, LLC, December 19, 2017.

The property is listed within the CHMIRS database for three hazardous material incidents. In 2001, employees were complaining of light-headedness from gasoline fumes emitted during a UST removal taking place at the property. The UST was closed under the oversight of the Contra Costa County Environmental Health Department with no further assessment required. The second incident occurred in 2008 when 15 gallons of hydraulic oil was released from a trash compactor located in the property basement. The hydraulic oil release occurred on concrete and was cleaned up using absorbent. No soil and/or groundwater impacts occurred due to this release. In 2012, during the testing of an onsite generator, the day storage tank overflowed into the containment area. A licensed contractor responded to the incident. During the cleanup, it was discovered that some of the diesel fuel spilled into an onsite sump. The sump was pumped out. The spill was reportedly contained on the facility. No impacts to soil and/or groundwater were reported. Based on the lack of reported impacts to soil and/or groundwater, these hazardous material incidents are considered to be *de minimis conditions* which require no further assessment at this time.

ATC reviewed files for the property at the California Department of Toxic Substance Control (DTSC) office on November 21, 2013. A Uniform Hazardous Waste Manifest, dated April 22, 1991, revealed that 18 yards of Non-RCRA Hazardous Waste Solid (oil-contaminated soil) was removed from the property. Details regarding the location of the excavated oil-contaminated soil were not provided. In addition, no incident of release was reported for the property. Based on the current regulatory status and the information provided within the Uniform Hazardous Waste Manifest, ATC concludes that the removal of the oil-contaminated soil from the property represents a *historical recognized environmental condition* which requires no further assessment at this time.

The gasoline UST was used for fueling fleet vehicles operated by Pacific Bell. No soil or groundwater impacts are reported. The UST was closed under the oversight of the Contra Costa County Environmental Health Department with no further assessment required. Based on the regulatory closure status of the property's former UST, this listing is considered to be a *historical recognized environmental condition* which requires no further assessment at this time.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Bishop Ranch
2600 Camino Ramon
San Ramon, California 94583

Based on information collected from the Phase I ESA, ATC offers the following recommendations:

- As discussed in Section 5.3.9, asbestos was previously identified in June 2016 in the form of 5% asbestos in samples of the black floor tile mastic. In August and September of 2016, Patriot Environmental Laboratory Services, Inc. performed clearance air sampling and all PCM clearance results indicate the asbestos fiber levels were below the EPA recommended clearance criteria of 0.01 fibers per cubic centimeter of air.

ATC notes the building was constructed in 1984 making the presence of Asbestos Containing Material (ACM) in the building unlikely. However, the potential always remains that asbestos could be present in an installed building component, finished surface or fixture due to the lack of a ban on certain asbestos-containing products, a manufacturing error, imported products or the use of old products; even though experience indicates this is not a common occurrence. Irrespective of industry experience, the Occupational Safety and Health Administration (OSHA), and the EPA's asbestos National Emissions Standards for Hazardous Air Pollutants (NESHAP) regulations requires testing of building materials in advance of renovation or demolition of building components, finished surfaces or fixtures regardless of age. This report recommends compliance with the referenced Federal law and those of State/Local agencies.

- Based on the construction date of the property, a survey for the presence of Lead Based Paint LBP on painted surfaces was not included in the scope of this ESA. Painted surfaces were observed to be in generally good condition at the time of the site reconnaissance.

As discussed in Section 5.3.9, lead was noted in several building materials according to a sampling in June 2016. Subsequent to the testing, a Lead-In-Construction Compliance Plan (Plan) was developed to comply with Federal and California Construction Lead Standards. The Plan provided general control and work practices, personal protective equipment, and exposure monitoring for lead construction materials. ATC recommends compliance with the Plan. In addition, a comprehensive survey for the presence of LBP on painted surfaces is recommended prior to any demolition, construction and/or remodeling activities.

- ATC conducted a screening survey for readily observable mold and conditions conducive to mold on the property. The screening consisted of limited interview, document review and physical observation. ATC did not observe any evidence of mold or moisture intrusion during the reconnaissance.

ATC interviewed the site contact, Mr. Jeff Finazzo, regarding potential mold conditions at the property. Mr. Finazzo provided the reports discussed in Section 5.3.9. The information documents the cleaning of the fan rooms and plenum rooms due to dark or black material found on the fans in October 2015. The daily field reports note that the site passed the semi-aggressive air testing and can be released for re-occupancy. ATC recommends that periodic visual assessments for the presence of mold on the fans be incorporated into the operation and maintenance plans for the building.

5.3.10 Other Historical Sources

No other historical sources were reviewed.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Bishop Ranch
2600 Camino Ramon
San Ramon, California 94583

6.0 SITE RECONNAISSANCE

The following is a summary of visual and/or physical observations of the property on the day of the site visit. Photographs can be found in Appendix C.

6.1 Methodology and Limiting Conditions

Mr. Gyan Rusconi, Project Scientist, and Mr. Bryan Campbell, Branch Manager, conducted the site reconnaissance on December 4, 2017 and was escorted by Mr. Jeff Finazzo. The site reconnaissance consisted of visual and/or physical observations of: the property and improvements; adjoining sites as viewed from the property; and, the surrounding area based on visual observations made during the trip to and from the property. Unimproved portions of the property were observed along the perimeter and in safely accessible areas, if accessible and possible. Building exteriors were observed along the perimeter from the ground, unless described otherwise. Building interiors in the north, south, east, and west wings and the basement were observed as they were made safely accessible, unless described otherwise.

6.2 Hazardous Substance Use, Storage, and Disposal

ATC observed the use, storage or disposal of hazardous substances on the property as summarized below.

| HAZARDOUS SUBSTANCE SUMMARY TABLE | | | | | | | |
|--|-----------------------------------|----------------|--|------------------|-----------------|---------------------|----------------------|
| Type/Use of Material | Quantity (No./Size) | Container Type | Location | Hazardous Waste? | MSDS or Labels? | Container Condition | Evidence of Release? |
| Diesel Fuel | Seven/250-500 gallons | AST | Basement | No | Yes | Good | No |
| Diesel Fuel | One/10,000 gallons | UST | Southeast parking lot | No | Yes | Good | No |
| Diesel Fuel | One/2,000 gallons | UST | Northwest parking lot | No | Yes | Good | No |
| Lead Acid Batteries | Approximately 5,000 gallons total | Retail Package | Basement | No | Yes | Good | No |
| Used Motor Oil | One/35 gallons | Drum | Basement | No | Yes | Good | No |
| Acetylene Gas | One/22 pounds | Cylinder | Basement | No | Yes | Good | No |
| Oxygen Gas | One/27 pounds | Cylinder | Basement | No | Yes | Good | No |
| Gasoline | Six/5 gallons | Gas Can | Flammable Cabinet within basement | No | Yes | Good | No |
| Assorted building maintenance supplies | Less than 5 gallons | Retail Package | Flammable Cabinet within basement | No | Yes | Good | No |
| Janitorial cleaning supplies | Less than 5 gallons | Retail Package | Janitorial closets throughout property | No | Yes | Good | No |
| Waste Oil | One / 30-gallon | Drum | HAZMAT Storage | Yes | Yes | Good | No |
| Waste Paint Cans | One / 55-gallon | Drum | HAZMAT Storage | Yes | Yes | Good | No |

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Bishop Ranch
2600 Camino Ramon
San Ramon, California 94583

| HAZARDOUS SUBSTANCE SUMMARY TABLE | | | | | | | |
|-----------------------------------|---------------------|----------------|----------------|------------------|-----------------|---------------------|----------------------|
| Type/Use of Material | Quantity (No./Size) | Container Type | Location | Hazardous Waste? | MSDS or Labels? | Container Condition | Evidence of Release? |
| Oily Debris | One / 55-gallon | Drum | HAZMAT Storage | Yes | Yes | Good | No |
| UST Test Water | One / 55-gallon | Drum | HAZMAT Storage | Yes | Yes | Good | No |
| Aerosol Cans | One / 55-gallon | Drum | HAZMAT Storage | Yes | Yes | Good | No |
| Used Batteries | 1 Bucket | Bucket | Basement | No | Yes | Good | No |
| Various gases | 10 tanks | Tank | Basement | No | Yes | Good | No |

A small designated hazardous waste storage area was observed within the loading dock area of the building's basement. No significant staining was noted on the concrete floor within or adjacent to the storage area. The hazardous wastes are properly removed by a local recycling company on an as needed basis.

The presence of the listed hazardous substances does not represent a *recognized environmental condition* based on observed conditions.

6.3 Underground Storage Tanks (USTs)

ATC observed evidence of USTs on the property as summarized below.

| UST SUMMARY TABLE | | | | | | | |
|-----------------------|----------------|------------------------|----------|--------------------|------------|--------------|-----------------------------|
| Location | Year Installed | Construction Materials | Contents | Capacity (gallons) | Use Status | Registration | Leak Detection & Prevention |
| Southeast parking lot | 1985 | Steel | Diesel | 10,000 | Active | Yes | Yes |
| Northwest parking lot | 1996 | Steel | Diesel | 2,000 | Active | Yes | Yes |

Both existing USTs were found to be equipped with alarms and no leaks have been reported since their installation according to the contact Mr. Jeff Finazzo.

According to historical and regulatory research, in 2001, a 12,000-gallon gasoline UST was removed from the property. The gasoline UST was used for fueling fleet vehicles operated by Pacific Bell. No soil or groundwater impacts are reported. The UST was closed under the oversight of the Contra Costa County Environmental Health Department with no further assessment required. ATC concludes that the historical USTs do not represent a current *historical recognized environmental condition*.

ATC observed what appeared to be two tank backfill wells on the property. These wells are associated with the two current onsite USTs. One well is located within the southeastern-most parking lot near the fill port for the 10,000-gallon UST, the other is located within the northwestern-most parking lot near the fill port for the 2,000-gallon UST. ATC concludes that the backfill wells do not represent a *recognized environmental condition*.

6.4 Aboveground Storage Tanks (ASTs)

ATC observed evidence of ASTs on the property as summarized below.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Bishop Ranch
2600 Camino Ramon
San Ramon, California 94583

| AST SUMMARY TABLE | | | | | | | |
|-------------------|----------------|------------------------|-----------------|--------------------|------------|----------------|-----------------------------|
| Location | Year Installed | Construction Materials | Contents | Capacity (gallons) | Use Status | Registration | Leak Detection & Prevention |
| Basement | 1985 | Double-walled steel | Diesel | 500 | Active | Not Applicable | Yes / Secondary containment |
| Basement | 1985 | Double-walled steel | Diesel | 275 | Active | Not Applicable | Yes / Secondary containment |
| Basement | 1985 | Double-walled steel | Diesel | 150 | Active | Not Applicable | Yes / Secondary containment |
| Basement | 1985 | Double-walled steel | Diesel | 275 | Active | Not Applicable | Yes / Secondary containment |
| Basement | 1985 | Double-walled steel | Diesel | 275 | Active | Not Applicable | Yes / Secondary containment |
| Basement | 1985 | Double-walled steel | Diesel | 275 | Active | Not Applicable | Yes / Secondary containment |
| Basement | 1985 | Double-walled steel | Diesel | 300 | Active | Not Applicable | Yes / Secondary containment |
| Basement | 1985 | Steel | Hydraulic Fluid | 500 | Active | Not Applicable | Yes / Secondary containment |
| Basement | 1985 | Steel | Freon 134A | 10,000 | Active | Not Applicable | No |
| Basement | 1985 | Steel | Freon 11 | 2,700 | Active | Not Applicable | No |
| Basement | 1985 | Steel | Freon 22 | 200,000 | Active | Not Applicable | No |

The ASTs were in good condition and free of significant stains and leaks. Based upon observations at the time of the property reconnaissance, ATC concludes that the ASTs do not represent a *recognized environmental condition* to the property.

6.5 Other Petroleum Products

ATC observed evidence of the use, storage or disposal of other petroleum products in, on or at the property

| OTHER PETROLEUM PRODUCTS | | | | |
|--------------------------|-------------------------------|-------------------------|---------------------|--------------------------------|
| Type of Material | Quantity & Container Type | Location | Use | Condition of Containers & Area |
| Elevator hydraulic fluid | One 55-gallon metal container | Elevator equipment room | Routine maintenance | Good, no leaks or spills |

The container was in good condition and free of significant stains and leaks. Based upon observations at the time of the property reconnaissance, ATC concludes that the metal drums containing hydraulic fluid do not represent a *recognized environmental condition* to the property.

6.6 Polychlorinated Biphenyls (PCBs)

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Bishop Ranch
2600 Camino Ramon
San Ramon, California 94583

There are a total of twenty one (20) elevators servicing the property which were all installed in 1984. One (1) of the elevators, which is utilized as a freight elevator, utilizes hydraulic oil. The remaining eighteen (18) passenger elevators are electric elevators and do not utilize hydraulic oil.

No oil stains were reported in the service rooms associated with the elevators, which are serviced routinely. Based on the regular service schedule and lack of evidence of releases, these systems are not considered to represent an environmental concern to the property.

ATC observed two hydraulic trash compactors and one hydraulic bailor located within the basement of the property. The hydraulic compactors and bailor was observed in fair condition, with minor staining from leaks and/or spills. Due to the location of the staining (underneath the units) it was difficult to determine if the staining was caused by hydraulic oil or from trash substances leaking from the compactor during routine operations. ATC recommends improved housekeeping measures within the area of the trash compactor.

ATC observed six hydraulic lifts within the property basement. The hydraulic lifts were observed in fair condition with minor staining from leaks and/or spills. ATC could not determine if the staining was caused by hydraulic oil. ATC did not detect the odor of hydraulic fluid within the vicinity of the stained areas.

ATC concludes that the observed stained areas in the vicinity of the hydraulic trash compactors, hydraulic bailor, and the hydraulic lifts do not represent a *recognized environmental condition* to the property at this time.

6.7 Unidentified Substance Containers

ATC did not observe the presence of unidentified substance containers on the property.

6.8 Nonhazardous Solid Waste

ATC observed evidence of the generation, storage or disposal of nonhazardous solid waste in, on or at the property as summarized below.

| NONHAZARDOUS SOLID WASTE SUMMARY TABLE | | | | | | |
|--|--------------------|----------|----------------------------|----------|-------------------------------------|----------------------|
| Type of Waste | Generation Process | Quantity | Type of Storage | Location | Disposal/Removal Method & Frequency | Evidence of Release? |
| Municipal solid waste and recycling | General operations | Unknown | Trash Compactor/ Dumpsters | Basement | Amador Valley Industries & Weekly | No |

The presence of the listed nonhazardous solid waste does not represent a recognized environmental condition based on observed conditions.

6.9 Wastewater

ATC observed evidence of wastewater generated, treated or discharged (including sanitary sewage and stormwater) in, on or at the property or to adjoining properties as summarized below.

| WASTEWATER SUMMARY TABLE | | | |
|--------------------------|--------------------|------------------------------------|----------------|
| Type of Wastewater | Generation Process | Treatment System? | Discharged To? |
| Sanitary sewage | General operations | No | Sanitary sewer |
| Stormwater | General operations | No | Storm sewer |
| Rinsewater | Kitchen operations | Yes, Four stage grease interceptor | Sanitary sewer |

The identified wastewater sources does not represent a *recognized environmental condition* based on observed conditions.

6.10 Waste Pits, Ponds and Lagoons

There are two lakes on the property referred to as East Lake and West Lake. No stressed vegetation or stained soil was observed in the vicinity of the lakes during the site reconnaissance. Refer to Section 5.2.5 for further discussion regarding the West Lake.

6.11 Drains and Sumps

ATC observed evidence of drains and/or sumps in, on or at the property as summarized below.

| DRAINS AND SUMPS | | | | | | |
|-------------------------|----------|--|---------------------|------------|----------------------------------|---|
| Location | Age | Construction Materials | Capacity & Contents | Use Status | Discharges To or Disposal Method | Condition of Drain/Sump & Area |
| Throughout the property | 33 years | Reinforced concrete and steel piping sumps | 11 | Active | Sewer system/dewatering | No cracks or leaks observed, no spills, stains or odors |

The identified sumps do not represent a *recognized environmental condition* based on observed conditions.

6.12 Septic Systems

ATC did not observe evidence of a septic system in, on or at the property.

6.13 Stormwater Management System

Stormwater at the property flows over building rooftops, paved parking lots, roadways and landscaped areas, and travels towards the roadways adjacent to the property to drain into curb-inlets, which discharge into the municipal stormwater system. The property is a mix of landscaped areas and developed land with covered areas consisting of building footprints and parking lots. The observed vegetation did not exhibit signs of biological stress. The parking/driveway areas are paved and in good condition with some areas of oil staining from parked cars. No strong odors or stressed vegetation was observed.

6.14 Wells

According to the site contact Jeff Finazzo, two groundwater wells were located on the property until 2018. One well was located on the northwest parking lot and the second well was located in the planter area directly south of West Lake. Both wells were piped directly to the West Lake. The wells were decommissioned in 2018 in accordance with the RWQCB requirements and, as such, do not represent a *recognized environmental condition* based on observed conditions.

7.0 SUBSURFACE VAPOR MIGRATION

Hazardous gases (vapor) from subsurface sources, such as contaminated soil or groundwater can migrate into residential, commercial, and industrial buildings with any foundation type, including basements, crawlspaces, or slabs. According to EPA guidance, three conditions must exist for hazardous vapors to reach the interior of buildings from the subsurface environment underneath or near a building. First, a source of hazardous vapors must be present in the soil or in groundwater underneath or near a building. Second, vapors must form and have a pathway along which to migrate toward the building. Third, entry routes must exist for the vapors to enter the building, and driving forces must exist to draw the vapors into the building.

ATC considered the nature and extent of on-site and nearby sources of potential subsurface vapor migration by evaluating the current and historical usage of the property, the construction type and history, the physical setting, and the potential sources of subsurface vapor migration through the review of regulatory agency database information that was summarized in Section 5.0. Based on the evaluation of the known or suspected releases of hazardous substances or petroleum products, distance from the property, potential pathways, and soil type, et al, no potential subsurface vapor migration sources were determined to represent a *recognized environmental condition*.

8.0 INTERVIEWS

The following persons were interviewed to obtain information regarding *recognized environmental conditions* in connection with the property:

| INTERVIEW SUMMARY | | | | |
|-------------------|--------------|---|----------------------------|----------------|
| Role | Name | Title/Company | Years Assoc. With Property | Interview Type |
| Site Contact | Jeff Finazzo | Director of Facilities / Sunset Development Co. | Five | In person |
| Site Escort | Kris Vargas | Senior Manager / Sunset Development Co. | Seven | In person |

Not included in this list are those governmental employees that were contacted solely for the purpose of retrieving public information pertaining to the property and who would not be expected to have firsthand knowledge of recognized environmental conditions at the property.

Pertinent information from the interviews is discussed in applicable sections of this report with details (including failed attempts to interview) documented on Record of Communication forms in Appendix J.

9.0 OTHER ENVIRONMENTAL CONDITIONS

9.1 Asbestos-Containing Materials (ACM)

Based on the scope of work for this ESA, sampling and analysis for ACM was not conducted. All suspect ACM should be properly assessed prior to disturbance from construction or maintenance activities. Observed building materials and finishes were noted to be in good condition at the time of the site visit.

As discussed in Section 5.3.9, asbestos was previously identified in June 2016 in the form of 5% asbestos in samples of the black floor tile mastic. In August and September of 2016, Patriot Environmental Laboratory Services, Inc. performed clearance air sampling and all PCM clearance results indicate that the asbestos fiber levels were below the EPA recommended clearance criteria of 0.01 fibers per cubic centimeter of air.

ATC notes that the building was constructed in 1984 making the presence of ACM in the building unlikely. However, the potential always remains that asbestos could be present in an installed building component, finished surface or fixture due to the lack of a ban on certain asbestos-containing products, a manufacturing error, imported products or the use of old products; even though experience indicates this is not a common occurrence. Irrespective of industry experience, the OSHA, and the EPA's asbestos NESHAP regulations requires testing of building materials in advance of renovation or demolition of building components, finished surfaces or fixtures regardless of age. This report recommends compliance with the referenced Federal law and those of State/Local agencies.

9.2 Radon

Radon is a naturally occurring colorless, odorless gas that is a by-product of the decay of radioactive materials potentially present in bedrock and soil. The EPA guidance action level for annual residential exposure to radon is 4.0 picoCuries per liter of air (pCi/L). The guidance action level is not a regulatory requirement for private owners of commercial real estate, but is commonly used for comparison purposes to suggest whether further action at a building may be prudent.

ATC's review of published propensity data revealed that the property is located in United States Environmental Protection Agency (USEPA) Zone 2, an area where indoor radon levels are predicted to be equal to or greater than 2.0 pCi/L and equal to or less than 4.0 pCi/L of air. Of 40 reported radon tests in Contra Costa County, only three tests resulted in radon levels greater than 4.0 pCi/L. Based on the available statistics and commercial use of the property, radon is not considered to represent a concern.

9.3 Lead in Drinking Water

The drinking water utility provider for the property and surrounding area is the EBMUD. According to the 2018 EBMUD Annual Water Quality Report, the municipally supplied water meets or exceeds all drinking water standards, including those for lead. A copy of the water quality report is included in Appendix L. Lead in drinking water testing was not conducted for this Phase I ESA.

9.4 Lead-Based Paint (LBP)

Based on the construction date of the property, a survey for the presence of LBP on painted surfaces was not included in the scope of this ESA. Painted surfaces were observed to be in generally good condition at the time of the site reconnaissance.

As discussed in Section 5.3.9, lead was noted in several building materials according to a sampling in June 2016. Subsequent to the testing, a Plan was developed to comply with Federal and California Construction Lead Standards. The Plan provided general control and work practices, personal protective equipment, and exposure monitoring for lead construction materials. ATC recommends compliance with the Plan. In

addition, a comprehensive survey for the presence of LBP on painted surfaces is recommended prior to any demolition, construction and/or remodeling activities.

9.5 Mold Screening

ATC conducted a screening survey for readily observable mold and conditions conducive to mold on the property. The screening consisted of limited interview, document review and physical observation. ATC did not observe any evidence of mold or moisture intrusion during the reconnaissance.

ATC interviewed the site contact, Mr. Jeff Finazzo, regarding potential mold conditions at the property. Mr. Finazzo provided the reports discussed in Section 5.3.9. The information documents the cleaning of the fan rooms and plenum rooms due to dark or black material found on the fans in October 2015. The daily field reports note that the site passed the semi-aggressive air testing and can be released for re-occupancy. ATC recommends that periodic visual assessments for the presence of mold on the fans be incorporated into the operation and maintenance plans for the building.

In addition, Mr. Finazzo provided info regarding a suspected mold incident in March, 2019 during a small demolition job in the B Level of 2600 (BC 210 and BC 230), what appeared to be dormant mold in a hardened state was found in the baseboard area of two walls covering an aggregate of between 5 and 10 linear feet. It was removed by OSHA certified Sunset personnel and the metal studs and wall cavities were treated with mold inhibitor to further clear the area.

9.6 Additional User Requested Conditions

No additional User requested services were included in the scope of work for this ESA.

11.0 TERMINOLOGY

The following provides definitions and descriptions of certain terms that may be used in this report. Italics indicate terms that are defined by ASTM Standard Practice E1527-13. The Standard Practice should be referenced for further detail (such as the precise wording), related definitions or additional explanation regarding the meaning of terms.

recognized environmental condition(s) (REC) - the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

material threat - a physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the environmental professional (EP), is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank system that contains a hazardous substance and which shows evidence of damage such that it may cause or contribute to tank integrity failure with a release of contents to the environment.

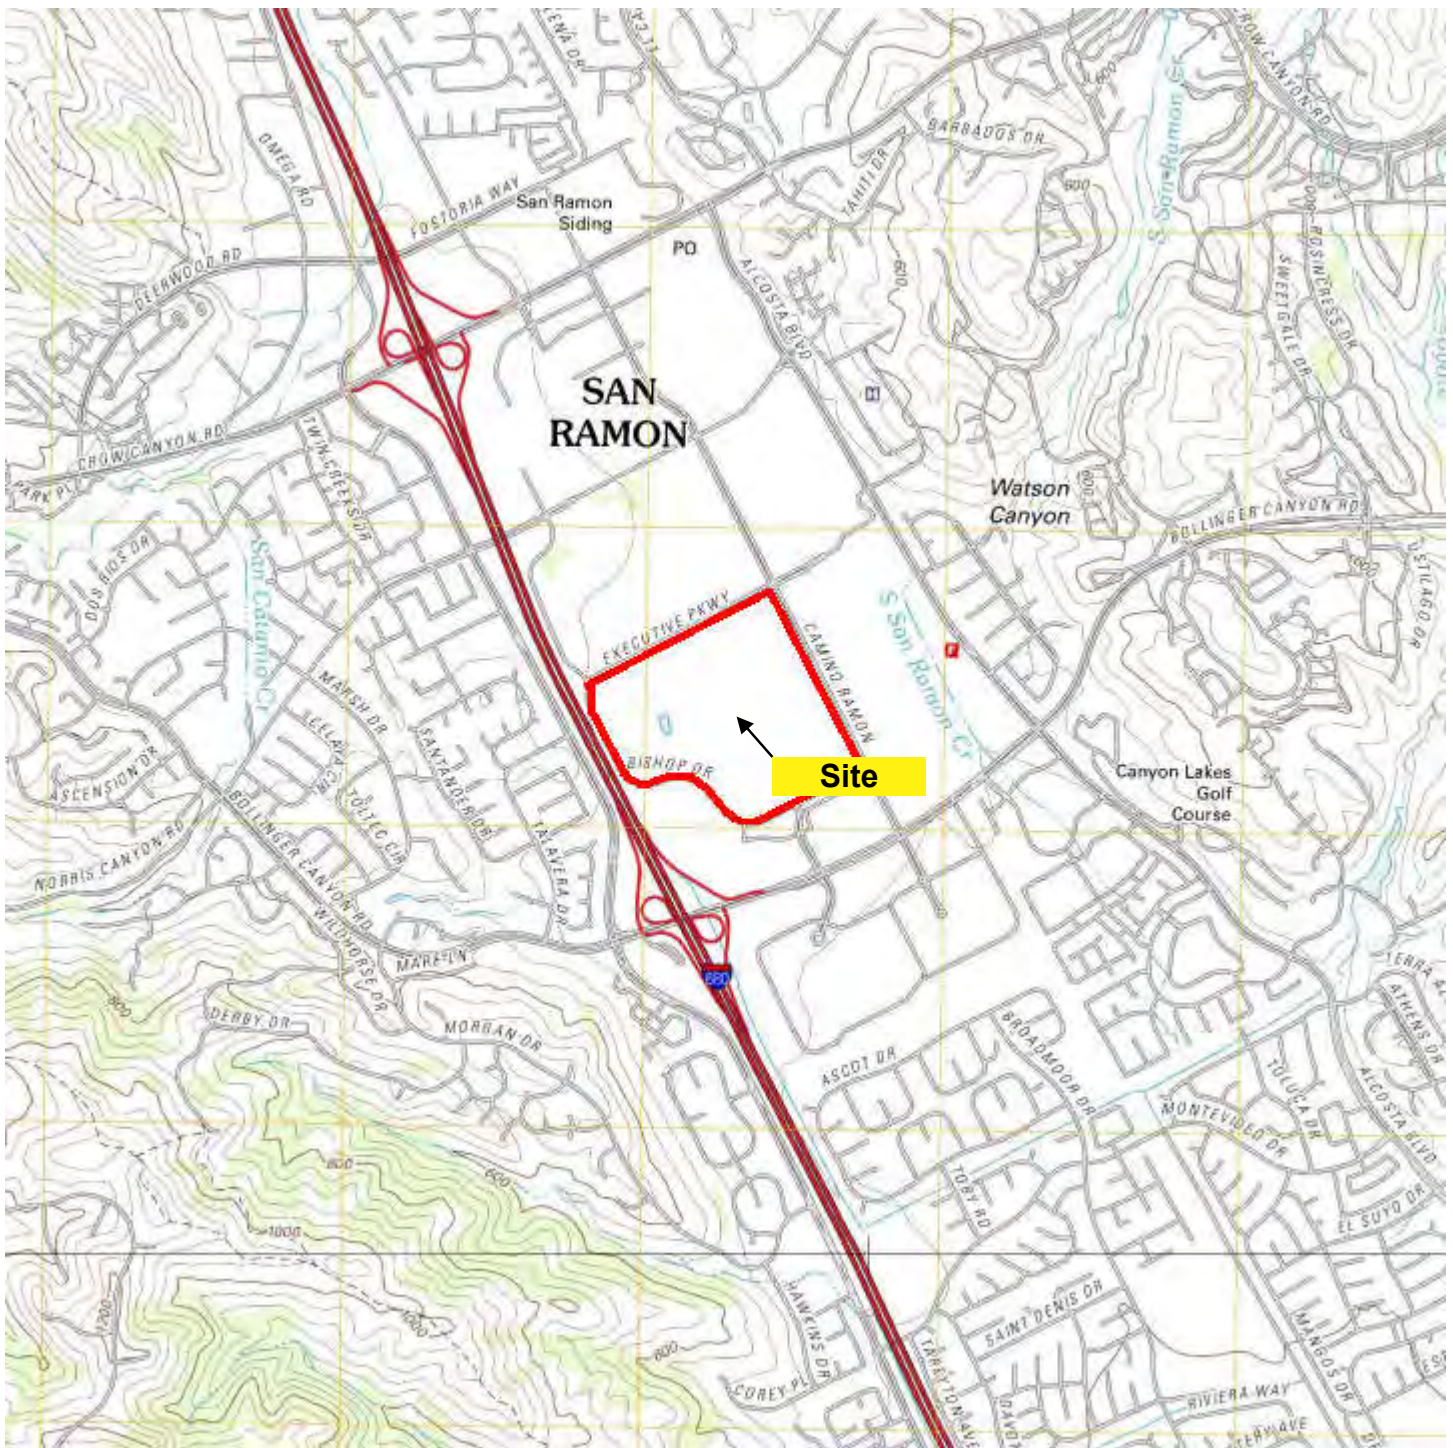

de minimis condition – is a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of the appropriate governmental agencies. An example might include a release of *hazardous substances* or *petroleum products* that could reasonably and foreseeably result in a concentration exceeding the applicable regulatory agency risk-based residential standards or substantial damage to natural resources. The risk of that exposure or damage would represent a threat to human health or the environment. If an enforcement action would be less likely than not, then the condition is considered to be generally not likely the subject of an enforcement action. A condition determined to be *de minimis* is not a *REC* or *controlled recognized environmental condition (CREC)*.

historical recognized environmental condition(s) (HREC) - a past release of any *hazardous substances* or *petroleum products* that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a *HREC*, the EP must determine whether the past release is a *REC* at the time the assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a *REC* at the time the Phase I ESA is conducted, the condition will be reported in Section 1.2 the Findings and Conclusions Summary table as a *REC*.

controlled recognized environmental condition (CREC) - a *recognized environmental condition* resulting from a past release of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitation, institutional controls, or engineering controls). Per E1527-13, a *CREC* will be reported in the Section 1.2 Findings and Conclusions Summary table as a *CREC* and a *REC*.

migrate/migration - refers to the movement of *hazardous substances* or *petroleum products* in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1

EXECUTIVE SUMMARY

CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which

EXECUTIVE SUMMARY

there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 01/28/2019 has revealed that there are 4 CA ENVIROSTOR sites within approximately 1 mile of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 3 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that there are 8 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS Description: Hazardous Waste Generator

Violations:

Site ID: 497
Site Name: 2600 Camino Ramon
Violation Date: 02-03-2017
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Hazardous Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 08/10/2017.
Violation Division: Contra Costa County Health Services Department
Violation Program: HW
Violation Source: CERS

Site ID: 497
Site Name: 2600 Camino Ramon
Violation Date: 04-16-2018
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to address in the SPCC Plan the type of oil and storage capacity for each fixed container, and either the type of oil and storage capacity for each mobile or portable container, or an estimate of the potential number of mobile or portable containers, the types of oil, and anticipated storage capacities.
Violation Notes: Returned to compliance on 05/08/2018. OBSERVATION: AST #6 is listed at 300 gallons, but appears to be approx 10x55 gallons (500 gallons). Failure to address in the SPCC Plan the storage capacity for each fixed container CORRECTIVE ACTION: Amend the SPCC Plan to properly address the type and storage capacity of all fixed, portable and/or mobile containers, including an estimate of the number of portable or mobile containers.

Violation Date: 02-01-2018
Citation: 23 CCR 16 2637(e) - California Code of Regulations, Title 23, Chapter
16, Section(s) 2637(e)

Violation Description: Failure to submit a copy of the secondary containment test results to
the UPA within 30 days after the test.
Violation Notes: Returned to compliance on 02/01/2018. OBSERVATION: Owner/Operator did
not submit secondary containment test results to the CUPA within 30
days after the test. The facility conducted SB989 Secondary
Containment testing on 5/18/17 but failed to provide CCHS-HMP with a
copy of the test. CORRECTIVE ACTION: CORRECTED ON SITE. A copy of the
5/18/17 SB989 test was provided to the inspector at time of
inspection.

Violation Division: Contra Costa County Health Services Department
Violation Program: HW
Violation Source: CERS

Site ID: 497
Site Name: 2600 Camino Ramon
Violation Date: 04-16-2018
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to address in the SPCC Plan the type of oil and storage capacity for each fixed container, and either the type of oil and storage capacity for each mobile or portable container, or an estimate of the potential number of mobile or portable containers, the types of oil, and anticipated storage capacities.
Violation Notes: Returned to compliance on 05/08/2018. OBSERVATION: AST #6 is listed at 300 gallons, but appears to be approx 10x55 gallons (500 gallons). Failure to address in the SPCC Plan the storage capacity for each fixed container CORRECTIVE ACTION: Amend the SPCC Plan to properly address the type and storage capacity of all fixed, portable and/or mobile containers, including an estimate of the number of portable or mobile containers.

| Injuries: | Not reported |
| Fatals: | Not reported |
| Comments: | Not reported |
| Description: | 7 employees at the Pacific Bell Office complained of light headedness, nauseous for a gasoline type smell. They are being examined at scene - unknown if they will be transported to a medical facility for further evaluations. An unknown number of employees have been evacuated. She will call back with the number of evacuees. There is an underground gasoline storage tank being removed near the building. |

FINDS:

Registry ID: 110002803510

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 02/19/2019. OBSERVATION: CCHSHMP observed that the business did not include hydraulic oil container for the elevator, Fluorescent lights, and testing water in the Hazardous Materials Inventory in the CERS. CORRECTIVE ACTION: The business completed and electronically submitted the chemical inventory information for all reportable hazardous materials on site at or above reportable quantities in the CERS during the inspection. No further action is required.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 1438

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 807

Waste code: D005
Waste name: BARIUM

Violation Notes: response plan and procedures for a release or threatened release of a hazardous material.
OBSERVATION: The business failed to electronically submit adequate emergency response procedures for a release or threatened release of a hazardous material. CCHSHMP reviewed the existing Consolidated Emergency Response/Contingency Plan (CERCP) submitted in the CERS. CCHSHMP observed that the existing CERCP had an invalid Local Unified Program Agency (CUPA) phone number. CORRECTIVE ACTION: The business must electronically submit adequate emergency response procedures for a release or threatened release of a hazardous material within 30 days in the CERS.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GREENHOUSE GAS REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

S113166744

Violation Date: 02-19-2019
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months."
Violation Notes: OBSERVATION: Owner/Operator failed to meet the following spill container requirements: maintain spill container which is liquid-tight. Service Technician observed that there is failure at the fill cap. CORRECTIVE ACTION: Install or repair spill buckets to meet all of the listed requirements, have tightness tested using approved method, by certified UST service technician, and submit documentation to verify compliance. Maintain all testing records for 36 months.

Violation Notes: none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: install or maintain a liquid-tight spill bucket. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container. Be resistant to galvanic corrosion.
Returned to compliance on 02/12/2018. OBSERVATION: Owner/Operator did not maintain spill bucket which is liquid-tight. Tank 1-west(001) spill bucket failed testing due to a fill cap. Tank 2-east (87) spill bucket failed testing, and service technician was unable to isolate the issue during testing. CORRECTIVE ACTION: Install or repair spill bucket so that it is liquid-tight, has a minimum capacity of five gallons, has a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and is resistant to galvanic corrosion. If facility needs to break concrete for the 2-east spill bucket, obtain a permit with CCHSHMP for this work. Submit verification/passing test results.

Violations:

Site ID: 72346
Site Name: SUNSET DEVELOPMENT COMPANY
Violation Date: 02-19-2019
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2

Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

Violation Notes: OBSERVATION: Owner/Operator failed to meet the following spill container requirements: maintain spill container which is liquid-tight. Service Technician observed that there is failure at the fill cap. CORRECTIVE ACTION: Install or repair spill buckets to meet all of the listed requirements, have tightness tested using approved method, by certified UST service technician, and submit documentation to verify compliance. Maintain all testing records for 36 months.

Site ID: 72346
Site Name: SUNSET DEVELOPMENT COMPANY
Violation Date: 02-11-2016
Citation: HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple

Violation Description: Business Plan Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 06/03/2016.
Violation Division: Contra Costa County Health Services Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 72346
Site Name: SUNSET DEVELOPMENT COMPANY
Violation Date: 02-19-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: OBSERVATION: The enunciator (Audio/Visual) used as the overfill prevention system is not currently functional due to wiring issues. The ATG has been tested and is working as designed. The facility is aware of the issue and has stopped filling the tank until repair has been completed, and has already begun repair including running new conduit to the enunciator yesterday. CORRECTIVE ACTION: Immediately discontinue deposition of petroleum into this tank until the component is repaired or replaced and tested with appropriate notification sent to the CUPA for testing, and results of testing. If the failed component can't be replaced in a timely manner, there is a possibility that the UST system may be red tagged to prevent fuel inputs.

Violation Date: 02-09-2018
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure to comply with one or more of the following: Failure to install or maintain a liquid-tight spill bucket. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container. Be resistant to galvanic corrosion.
Violation Notes: Returned to compliance on 02/12/2018. OBSERVATION: Owner/Operator did not maintain spill bucket which is liquid-tight. Tank 1-west(001) spill bucket failed testing due to a fill cap. Tank 2-east (87) spill bucket failed testing, and service technician was unable to isolate the issue during testing. CORRECTIVE ACTION: Install or repair spill bucket so that it is liquid-tight, has a minimum capacity of five gallons, has a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and is resistant to galvanic corrosion. If facility needs to break concrete for the 2-east spill bucket, obtain a permit with CCHSHMP for this work. Submit verification/passing test results.

CERS TANKS:

Site ID: 72346
CERS ID: 10005796
Site Name: SUNSET DEVELOPMENT COMPANY
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 72346
Site Name: SUNSET DEVELOPMENT COMPANY
Violation Date: 02-19-2019
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2

Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

Violation Notes: OBSERVATION: Owner/Operator failed to meet the following spill container requirements: maintain spill container which is liquid-tight. Service Technician observed that there is failure at the fill cap. CORRECTIVE ACTION: Install or repair spill buckets to meet all of the listed requirements, have tightness tested using approved method, by certified UST service technician, and submit documentation to verify compliance. Maintain all testing records for 36 months.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 03/15/2018. OBSERVATION: The business failed to complete and electronically submit chemical inventory information for all reportable hazardous materials on site at or above reportable quantities. Oxygen (355cf) and Acetylene (294cf) on site above reportable thresholds (200cf). Nitrogen currently not above reportable thresholds (1000cf), but empty and full containers on site show potential for facility to be above 1000cf. Waste paint on site above 55gal. 55gal SB989 testing water on site. 25-5-5 Granular Fertilizer reported on the inventory but not currently being used, new fertilizers should be evaluated for whether they are regulated as irritants/sensitizers or more. Facility should review inventory tapes to check on gasoline inventory - facility has max capacity of 20,000 gal but is currently only reporting 10,000 gal as the max amount on site. CORRECTIVE ACTION: Complete and electronically submit the chemical inventory information for all reportable hazardous materials on site at [Truncated]

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: OBSERVATION: The enunciator (Audio/Visual) used as the overfill prevention system is not currently functional due to wiring issues. The ATG has been tested and is working as designed. The facility is aware of the issue and has stopped filling the tank until repair has been completed, and has already begun repair including running new conduit to the enunciator yesterday. CORRECTIVE ACTION: Immediately discontinue deposition of petroleum into this tank until the component is repaired or replaced and tested with appropriate notification sent to the CUPA for testing, and results of testing. If the failed component can't be replaced in a timely manner, there is a possibility that the UST system may be red tagged to prevent fuel inputs.

Violation Date: 02-09-2018
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665

Violation Description: Failure to comply with one or more of the following: Failure to install or maintain a liquid-tight spill bucket. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container. Be resistant to galvanic corrosion.

Violation Notes: Returned to compliance on 02/12/2018. OBSERVATION: Owner/Operator did not maintain spill bucket which is liquid-tight. Tank 1-west(001) spill bucket failed testing due to a fill cap. Tank 2-east (87) spill bucket failed testing, and service technician was unable to isolate the issue during testing. CORRECTIVE ACTION: Install or repair spill bucket so that it is liquid-tight, has a minimum capacity of five gallons, has a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and is resistant to galvanic corrosion. If facility needs to break concrete for the 2-east spill bucket, obtain a permit with CCHSHMP for this work. Submit verification/passing test results.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as

Registry ID: 110002627809

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/11/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

| | Data Release Frequency: Varies |

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 02/28/2019
Date Data Arrived at EDR: 03/01/2019
Date Made Active in Reports: 04/02/2019
Number of Days to Update: 32

Source: Department of Toxic Substances Control
Telephone: 916-323-3400
Last EDR Contact: 06/03/2019
Next Scheduled EDR Contact: 09/16/2019
Data Release Frequency: Varies

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 04/11/2019

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

USGS TOPOGRAPHIC MAP

Target Property Map: 5640382 DIABLO, CA
Version Date: 2012

South Map: 5640384 DUBLIN, CA
Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

| | |
|---|-------------------------|
| <u>Flood Plain Panel at Target Property</u> | <u>FEMA Source Type</u> |
| 06013C0464F | FEMA FIRM Flood data |
| <u>Additional Panels in search area:</u> | <u>FEMA Source Type</u> |
| 06013C0463F | FEMA FIRM Flood data |

NATIONAL WETLAND INVENTORY

| | |
|------------------------------------|--|
| <u>NWI Quad at Target Property</u> | <u>NWI Electronic Data Coverage</u> |
| DIABLO | YES - refer to the Overview Map and Detail Map |

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

| | |
|----------------|------------|
| Search Radius: | 1.25 miles |
| Status: | Not found |

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| <u>MAP ID</u> | <u>LOCATION FROM TP</u> | <u>GENERAL DIRECTION GROUNDWATER FLOW</u> |
|---------------|-------------------------|---|
| 4 | 1/2 - 1 Mile North | Not Reported |
| 5 | 1/2 - 1 Mile ENE | Not Reported |
| 6 | 1/2 - 1 Mile NNW | NE |
| 1G | 1/2 - 1 Mile NNW | NE |
| 2G | 1/2 - 1 Mile North | Not Reported |
| 3G | 1/2 - 1 Mile ENE | Not Reported |

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: CLEAR LAKE

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|--------------------|--|--|--|----------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 29 inches | clay | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils. | Max: 1.4 Min: 0.42 | Max: 8.4 Min: 7.4 |
| 2 | 29 inches | 59 inches | clay | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils. | Max: 1.4 Min: 0.42 | Max: 8.4 Min: 7.4 |

Soil Map ID: 2

Soil Component Name: BOTELLA

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

| Soil Layer Information | | | | | | | |
|------------------------|----------|-----------|--------------------|--|---|--|----------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 3 inches | clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay | Max: 4 Min: 1.4 | Max: 7.3 Min: 6.1 |
| 2 | 3 inches | 68 inches | silty clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay | Max: 4 Min: 1.4 | Max: 7.3 Min: 6.1 |

Soil Map ID: 3

Soil Component Name: PESCADERO

Soil Surface Texture: clay loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 168 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|------------------------------------|--|--|---|--------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |

| 2 | 5 inches | 42 inches | clay | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils. | Max: 4 Min: 1.4 | Max: 9 Min: 7.9 |
| 3 | 42 inches | 66 inches | stratified silt loam to silty clay | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils. | Max: 4 Min: 1.4 | Max: 9 Min: 7.9 |

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquiries (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of ATC Group Services LLC on Dec 01, 2017.

TARGET PROPERTY

2600 Camino Ramon
San Ramon, CA 94583

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeyman:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000

Permit Type: Bldg -

New Permit Number: 101000000405

Status: Valuation: \$1,000,000.00

Contractor Company: OWNER-BUILDER

Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ATC Group Services LLC were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.
