

Hot Air Balloon Spinner

SUPPLIES

- Paper (up to 5 different colors)
- Balloon template
- Empty Toilet Paper Roll Tube
- String, yarn or twine
- Glue
- Tape
- Scissor
- Pencil/markers

INSTRUCTIONS

Step 1: Draw the shape of the balloon on one cardstock paper.

Step 2: Hold all the five cardstock papers together. Cut along the balloon shape drawn on the first paper. This is to ensure that all the balloon shape cutouts are of the same size.

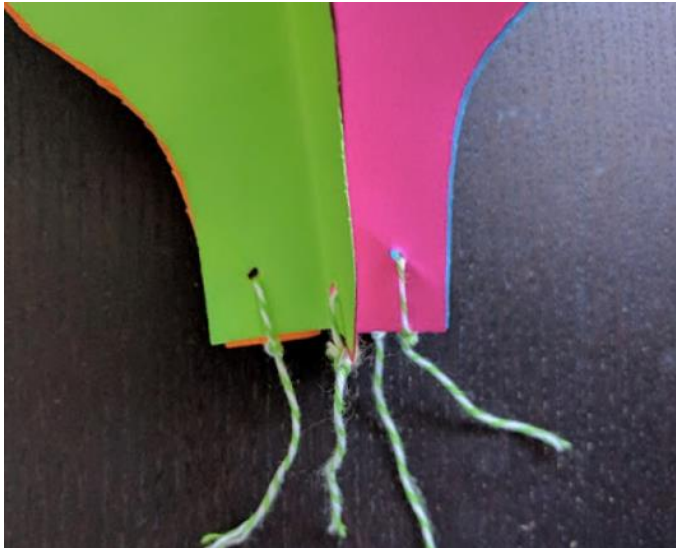

Step 3: Fold the cut outs from the middle.

Step 4: Glue all the cut outs together as shown below. Also, glue a twine in the middle making a nice hanging for the balloon.

Step 5: Punch small holes on any four edges. Thread 7~8cm of twine through the holes and knot at one end as shown below.

Step 6: Cut a 3.5cm height cylindrical piece from a paper roll tube.

Step 7: Cut a few 3.5cm strips from the cardstock papers to decorate the tube.

Step 9: Glue/tape the four twine hanging from the balloon to the gondola. And the hot air balloon is ready to spin!
